Company: Inetum

Location: Belgium

Category: computer-and-mathematical

Mission

You have a broad in-depth knowledge of digital platforms, and you combine your technological insights and technical skills with a strong customer-oriented mindset, because you believe that customers deserve the best possible digital experience. Then you might be the person we are looking for...

For our division Digital Experience Platforms we are looking for an AEM Devops to support our business growth and customer projects in a fast changing digital landscape, where hyper-awareness, hyper-adoption and hyper-personalization define customer expectations.

Together with a cross-functional team of analysts, designers and developers you develop a clear understanding of the business needs and IT landscape. You define solid future-proof platform architecture in line with the IT strategy of organizations, and that meets the business objectives and integrates seamlessly with existing or new IT infrastructures.

Your responsibilities include:

Install and Configure Adobe Experience Manager

Troubleshoot AEM Environments

Operate Cloud Manager and Cloud Manager API

Install and configure Dispatcher

Manage AEM packages: Build and Deployments

Monitor and report on quality metrics

Together with the Developers and Architect design the appropriate architecture for the solutions we will build, always putting quality first.

Learn and share about new technologies/frameworks.

Profile

YOUR PROFILE

As an AEM Devops architect we expect that you:

Have extensive knowledge on the Adobe suite of applications (AEM, Target, Analytics, Forms, Campaign, ...) or are willing to acquire. Having similar experience on other DXP platforms such as Sitecore, Drupal, Liferay or Salesforce is a plus.

Will follow future evolutions of the product and define a strategy for clients how to make best use of it. You can demo these features and configure them to the client needs.

Have experience and/or strong interest

with managing the Adobe Cloud Manager.

with building tools, including Maven

with of version control tools, especially Git

with cloud services (AWS, Azure,...)

with basic Linux commands

with AEM maintenance tasks is a plus

with monitoring solutions (Dynatrace, NewRelic, ELK, ...)

with container technologies (Kubernetes, docker, helm, rancher, ...)

with quality systems (SonarQube, ...)

with source control and artifact repositories (NuGet, Artifactory, Nexus, ...)

Have good analytical skills, can work autonomous and are a true problem-solver.

Have good communication skills, both written and oral. Next to that, you are multi-lingual: English and Dutch or French.

It's a strong plus if you have experience with AEM Developer tools (e.g. Apache Felix, Apache Sling, Jackrabbit, CRXDE) and are familiar with the Java Content Repository API.

If that's you, come in and have a talk with us!
