

Analog Designer

[Apply Now](#)

Company: Chipright

Location: Belgium

Category: computer-and-mathematical

Senior Analog Design Consultant **The assignment**

Design state of the art analog IPs and chip.

Perform analog design from specification to documentation on block and top level according to the imec design flow.

Support the team's library and layout activities from an analog design perspective.

Actively contribute at design review meetings on-site.

Provide business managers with technical input and resource estimates for project proposals.

Communicate with customers and translate their ideas into specifications.

Required knowledge and skills

You have a Master's or PhD degree in Electrical/Electronic Engineering with a focus on analog design.

Must have enthusiasm to work in a service environment and contribute to a customer's goals.

Understanding of various MOS technologies as well as the analog/mixed-signal implementation flow including schematic design, simulation and full custom layout is necessary.

Knowledge of radiation effects on semiconductors and mitigation techniques is a plus.

Knowledge on library and/or memory design and characterization is also an asset.

Experience using the Cadence Design suite.

Team player with effective communication and reporting skills.

You are a self-motivated and creative experienced analog designer, with a proven track record in analog design projects for minimum 5 years.

Proficiency in English both written and spoken.
