

Automation Design Engineer

[Apply Now](#)

Company: Bekaert

Location: Deerlijk

Category: computer-and-mathematical

About the role

Bekaert Engineering is a part of the Bekaert NV group. The engineering headquarters is based in Belgium and is responsible for the development of new machines and prototypes being used around the world in our plants.

Bekaert Engineering is looking for an ambitious engineer that is willing to think out-of-the box to develop new prototypes and use his/her determination to finish projects to great customer satisfaction, around the world.

Your impact as Automation Engineer

You will be working on innovative automation projects in the Handling & Robotics Domain together with other mechanical, electrical design engineers and technology experts. We offer a broad spectrum of projects: logistical solutions for our internal product flows, robotization of difficult/non-ergonomic manual labor, development of solutions for sustainable green energy, ... (eg: mobile AGVs with robots on top to collect and deliver spools).

You contribute to the continuous improvement of our technology and to new developments. With your knowledge and commitment, you will grow into a global expert who helps to realize important design projects in a team and give support to our plants.

You are creative, innovative and enterprising in the development (R&D) and optimization of both existing and new processes and machines. By integrating new

technologies, you help to develop the equipment of the future.

You convert the technology and business requirements into design and process concepts. You work out these concepts with a team of designers and experts. In some cases, you will work with external partners to design, develop or build new technology or machines.

You are a real team player and together with the local team, you will guide the designers in our engineering entities worldwide (Belgium, India, Slovakia, Brazil and China). If necessary, you make visits to those foreign engineering entities or production factories.

Funcctieeisen

About you

Master degree in Industrial engineering control technology / automation / mechatronics

Experience with IEC 61131-3 PLC programming languages (Structured Text), drive/motion technology and industrial networks

If necessary, able to make visits to foreign engineering entities or production factories, travelling for short periods

Knowledge of English language

You are an analytic, creative and problem solving teamplayer

Extra skills that would make us very happy:

Knowledge of C programming language

Knowledge of Rockwell/Beckhoff platform

AGV and robotics experience

Your areas of interest... : Automation, logistics, robotics, machine/PLC control, ...

Bedrijfsomschrijving

Bekaert (www.bekaert.com) is a world market and technology leader in steel wire transformation and coating technologies. We pursue to be the preferred supplier for our steel wire products and solutions by continuously delivering superior value to our customers worldwide. Bekaert (Euronext Brussels: BEKB) is a global company with more than 27 000 employees worldwide, headquarters in Belgium and € 5.9 billion in combined revenue in 2021.

Arbeidsvoorwaarden

What we offer:

A challenging job within innovative automation projects. You will be part of an enthusiastic team helping you to grow and gain more responsibilities.

You have the option to explore the world by visiting our plants around the world.

This all will be combined with a competitive wage and an extensive benefits package

Our department lies in a traffic-jam-free area

20 vacation days + 17 ADV

A great opportunity to play your part in an international growth story.
