

## Automation Engineer (Electrical)

Apply Now

Company: Bekaert

Location: Belgium

Category: computer-and-mathematical

### About the role

You will work closely with the Global Design manager, design engineers, designers and technology experts. You contribute to the continuous improvement of our technology and to new developments. With your knowledge and commitment, you will grow into a global expert who helps to realize important design projects in a team.

Your area of responsibility:

You are creative, innovative and enterprising in the development (R&D) and optimization of **both existing and new processes and machines**. By integrating new technologies, you help to develop the equipment of the future.

You are responsible for **test setup and validation** of the new machinery. You have an eye for **quality control and safety system design**.

In some cases, you will work with external partners to design, develop or build new technology or machines.

You are a real team player and together with the local management, you will guide the designers in our engineering entities **worldwide** (Belgium, India, Slovakia, Brazil and China).

If necessary, you make visits to foreign engineering entities or production factories.

About you:

You have master degree in Industrial engineering control technology / automation / mechatronics

You have a passion for machine control and are willing to delve into it

You have a good knowledge of C programming language. Knowledge of Python is a plus.

You have experience with Safety System Design

Knowledge of industrial networks and associated protocols

You share knowledge and insights with colleagues

You are analytical, creative & problem-solving

You take initiative

You are communicative and are willing to work in an international context, traveling for shorter periods

You have a good knowledge of English

### **Why join us?**

At Bekaert, we are on a journey to establish the new possible. And to achieve this, we need passionate people that are eager to grow beyond their capabilities. We want people that are brave and willing to explore the unknown, even if it means failing sometimes. People that are ready to bring their whole self to work and are not afraid of expressing their opinions but also value the power of synergies, different perspectives & team spirit.

We are an equal opportunity employer and value diversity at our company. We do not discriminate based on race, religion, color, national origin, sex, gender, gender expression, sexual orientation, age, marital status, veteran status, or disability status.
