Azure Cloud Native Architect

Apply Now

Company: Codit

Location: Belgium

Category: computer-and-mathematical

About the Job

You're able to delve deep into customers' problems and come up with creative solutions, compelling proof of concepts or demos. You're then able to turn these solutions into technical design and documentation.

You ensure all solutions are architected by applying best practices for security, scalability, maintainability and observability.

You'll be guiding your team on the path to success by helping them with technical challenges, following-up on their projects and boosting them professionally.

You love to keep up-to-date with the latest tech and to share new discoveries with the technical community.

About You

You have:

A minimum 8 years of IT experience.

Knowledge of Cloud Native Architectures and Cloud Design Patterns.

Strong experience with automation and CICD pipelines.

Interest in containerization and Kubernetes.

Knowledge about Azure PaaS services (AppService, Serverless, Logic Apps, etc.) and

IoT.

Confidence to dive into development mode and prototype (.NET Core, Loosely coupled architectures, SOLID principles).

An agile mindset & good communication skills.

The ability to determine the right processes for the right project based on scalability, reliability, security needs, and taking budget into account. You focus on quality of the development process and deliverables.
