

## Business Analyst Compliance & Architecture

[Apply Now](#)

Company: Atlas Copco

Location: Antwerp

Category: computer-and-mathematical

.fit\_to\_content{width:%;height:auto}

### **Passionate people create exceptional things**

Our solutions are a key part of most industries - electronics, medical research, renewable energy, food production, infrastructure and many more. Working with us means working with the latest technologies and groundbreaking, sustainable innovations.

### **Join us on our journey for a better tomorrow.**

#### **The Role**

Are you driven by results and dedicated to delivering exceptional customer experiences? If you thrive in an environment that values integrity, encourages knowledge sharing, and promotes analytical thinking and positive communication, then look no further than Atlas Copco. Join our dynamic team as an experienced Business Analyst / Project Manager, playing a pivotal role in analyzing requests and driving impactful changes throughout the Power Technique Business Area. In collaboration with key stakeholders worldwide, you will focus on Enterprise Architecture, Compliance, and Cyber Security, providing optimal solutions. As a Business Analyst, you will act as a global representative for the Power Technique IT organization, reporting to the Manager of Enterprise Architecture, Compliance & Cyber Security.

An analytical mindset and a proactive drive to solve complex problems are key attributes we are looking for in this role. The Business Analyst should be adept at handling a constant stream of questions, efficiently addressing or distributing them to the team based on business priority. A service-driven and customer-centric attitude is highly valued, aligning with our commitment

to delivering exceptional experiences to our clients. Additionally, experience in project management and change management is expected, as it contributes to the overall success of the position.

### **What you can expect from us?**

When you join Atlas Copco you are entrusted with a great deal of responsibility from day one. **Why?** Because we know that you have the drive to develop on your own initiative and the ability to make sound decisions – but also that you will ask for help when you need it. Since you gladly share your knowledge and expertise, we can also give you more professional freedom.

Passionate people create exceptional things. We believe that people make it happen and with us you are empowered to act. Your ideas can make a real difference and contribute to the quality of life for people everywhere.

We are proud of our strong and efficient training and development processes. And we collaborate across national and competence borders, something that gives you the chance to move between business areas, countries and functions. Whether you want to change track in your career, become a specialist or manager – there is always an Atlas Copco way open for you.

At Atlas Copco, we have a world of experience behind us with all kinds of people from many backgrounds. The one thing we all have in common is that we are passionate about what we do and love new challenges. Each day brings us new opportunities to grow, both as persons and professionals.

### **Who are we?**

We are PT-IT (Power Technique - Information Technology), which delivers services to the Power Technique (PT) business area of Atlas Copco and its divisions around the world. The department operates from the Power Technique (PT) headquarters located in Antwerp, Belgium. PT-IT was founded in and employs about +20 people internally together with consultants and the shared IT Services organization to support our entities all over the world.

### **What we expect of you?**

University master's degree in computer science, engineering, or equivalent through experience.

Minimum 5 years' experience as a Business Analyst or Project Manager in enterprise

environments.

Experience in Compliance or Cyber Security is a significant advantage.

Certification in Project Management and/or Business Analysis is expected.

Certification in IT risk management or Governance of Enterprise IT (COBIT, CRISC, CISA, CISM, or CISSP) is a plus.

Experience working in an international context with diverse cultures and global teams.

Ability to work both independently and collaboratively within a team.

Flexibility, resilience, accuracy, and hands-on approach in managing deadlines.

Excellent English proficiency; additional languages (e.g., Dutch) are advantageous.
