

CISO – Information Security Manager - Liège

[Apply Now](#)

Company: Lease

Location: Liège

Category: computer-and-mathematical

Description

Function:

- Establish and enforce robust cybersecurity policies, standards, and procedures to minimize risks and ensure adherence to relevant laws and regulations.
- Identify, evaluate, and prioritize cybersecurity risks, developing effective strategies to manage and mitigate these risks efficiently.
- Lead the development and implementation of an incident response plan, overseeing responses to security incidents and conducting thorough post-incident analyses to enhance resilience.
- Drive ongoing security awareness initiatives, delivering comprehensive training programs to educate employees on the latest cybersecurity threats and best practices.
- Oversee the implementation and management of a proactive vulnerability management program to identify, assess, and address potential security vulnerabilities in software and systems.
- Conduct routine security audits and assessments to maintain compliance with security policies and identify areas for enhancement.
- Evaluate and address cybersecurity risks associated with third-party vendors and partners.
- Manage and oversee security monitoring tools to detect and respond to security incidents promptly, collaborating closely with the Group's Cyber Security Incident Response Team (CSIRT).
- Coordinate actions during cyber security incidents and crises, ensuring timely service

restoration.

- Apply the Group's Cyber Security reference framework, integrating entity-specific business needs and regulatory requirements into the framework.
- Serve as a local CISO for the group, collaborating closely with the Group's cybersecurity department.
- Provide cyber security expertise and support to IT teams and IT production.
- Perform internal controls on IT production and suppliers to ensure the correct implementation and application of security measures, safeguarding the entity's customer data and sensitive IT assets.
- Collaborate with the IT department and Chief Information Officer (CIO) to embed security practices into the development lifecycle and foster a culture of secure coding.
- Partner with the entity's procurement and legal departments to incorporate information security obligations into agreements with third parties.
- Ensure integration of security aspects into the company's project management process by introducing appropriate information security policies and practices.

Profile :

- Bachelor's or master's degree in computer science, cybersecurity, software engineering, or a related field. An MBA or equivalent business experience is advantageous.
- Demonstrated experience as an Information Security Manager or CISO in a senior information security leadership capacity within the IT sector.
- Thorough understanding of cybersecurity technologies, protocols, and best practices.
- Industry certifications such as CISSP, CISM, or equivalent are highly desirable.
- Strong comprehension of cybersecurity laws, regulations, and industry best practices.
- Proficient knowledge of software development processes and methodologies.
- Familiarity with financial markets, regulations, and industry-specific technology trends is beneficial.
- Exceptional leadership and team management abilities, coupled with a strong strategic mindset and organizational skills.
- Determination in achieving objectives and maintaining high ethical standards.
- Fluency in both French and English (written and spoken).
- Effective written and oral communication skills.
