Company: EORTC

Location: Bruxelles

Category: computer-and-mathematical

Share on

The Clinical Data Manager works under the hierarchical supervision of the Clinical Data Expert.

The Clinical Data Manager reports on study activities and status to the study team.

The Clinical Data Manager is responsible for all the steps required for the setup of the Data Management tools of a clinical trial and for the collection, review and validation of the clinical data promptly; this is to ensure the adequacy, integrity and quality of the data that are used to answer the questions of our studies. The Clinical Data Manager will carry out the following tasks, with the close coaching of a Clinical Data Expert:

Clinical trial protocol

Development of the Data Management sections of the clinical trial protocol

Assisting in the final review of the clinical trial protocol for consistency and operational feasibility

Case Report Forms

Development and definition of the study-specific Case Report Forms following the protocol and the EORTC Global Library

Development of the guidelines for Case Report Forms Completion

Database Design and Validation

Definition of the requirements for database design by the Study Designer

Defining the visit schedule

Development of the test plan and user tests for database validation

Coordination of user tests regarding database validation

Can perform the activities of a Study Designer as needed

Data handling

Coordination and control of data collection, data cleaning and data reporting activities

Application of QC to each stage in the data handling to ensure the data are reliable and processed in compliance with ICH-GCP requirements.

Communication with the participating investigators to resolve queries and collect missing data

Performing the reconciliation of SAEs with the clinical database when applicable

Other

Development and maintenance of the data management plan

Preparation and attendance of the medical review meetings with the Medical Representative

Contribution to EORTC Group Members newsletters

Proper filing of all study-related documents, in compliance with ICH-GCP requirements

Professional bachelor's or master's degree in a health-related or scientific discipline

Computer literate: programming skills as well as skills in the use and management of computer databases are strong assets

Knowledge of CDISC standards preferred, SDTM in particular

Experience in data monitoring and/or reviewing is an asset

Good organisational & administrative skills

Rigorous, attached to details

Excellent analytical skills

Team spirit

English very good (written & spoken), French & Dutch are assets

Permanent contract Wage according to our Non-Profit organisation status Hybrid working environment (from Belgium) 30 days holidays (full time) Meal vouchers Pension plan Hospitalisation insurance and ambulatory care Homeworking allowance Reimbursement of public transport Free parking
