

Cloud & DevOps Engineer

[Apply Now](#)

Company: SGS

Location: Mechelen

Category: computer-and-mathematical

Job Description

As a **Cloud & DevOps Engineer** you get to **play a key role in managing the Cloud infrastructure (Azure) and streamlining the software deployment process** of our inhouse developed application platform.

Part of your **main responsibilities** will be:

Manage and monitor all installed systems, infrastructure, and application deployments on Azure Cloud.

Deploy infrastructure and applications and make sure they are in line with our corporate policies.

Make sure the Cloud infrastructure, systems and applications are secure, reliable, and deployed in an efficient way.

Document and design processes / procedures and keep them up to date.

Qualifications

You have a **bachelor or master's in computer science or IT Engineering**.

You have **experience as a Cloud Engineer, DevOps Engineer** or a similar software engineering role.

Of course, you are **proficient in Azure Cloud Services**, with a good understanding of best

practices in security.

You have experience with Bicep or other Infrastructure as Code (IAC) tools.

You have hands-on experience with Linux server administration.

You can troubleshoot complex Cloud issues.

You have a problem-solving mind and you're eager to learn.

You can work under pressure.

You have excellent communication skills in English and can understand and speak Dutch.

You are a team player!

Please note for this vacancy we cannot support a Work Permit procedure.
