

Connected Technologies Product Lead

[Apply Now](#)

Company: Toyota Motor Europe

Location: Zaventem

Category: other-general

Your team and your responsibilities

Team description

In Connected Technologies (CT), you will be at the forefront of Toyota's transformation into a mobility company, offering an integrated Multimedia and Connectivity experiences. Your role will be instrumental in revitalizing and enhancing our product portfolio.

Your responsibilities

As the Product lead in the Connected Technologies division, you will lead the comprehensive product and service development strategies for our Connected Car (Multimedia & Digital key):

Define a robust Product, translating the Customer Journey into compelling use cases and product requirements.

Prioritize the backlog, meticulously evaluating customer benefits, business viability, and technical feasibility, while ensuring alignment with Global & Local Developments.

Oversee the technical feasibility assessments of our Product Leads, fostering close coordination with Global & Local Development teams.

You supervise Quality, ensuring connected services meet Toyota Quality Standard following end-to-end testing process and resolution of any deviation.

Manage Product Budget according to planning and adapt with creative ideas if

necessary.

Build compelling business case, founded on our business model, consolidated cost & profit, gaining approval through Project milestones by TME & TMC executives.

Maintain strict compliance with European laws and regulations, including GDPR, Cyber Security, and Software Update, for all connected products and services developed for Toyota Smart Cars.
