Consultant

117430BR

Job Description

Role –Consultant

Technology – AngularJS, TypeScript, Node.js, JavaScript (ES6), HTML5, SCSS/LESS

Location– BRUSSELS

Business Unit – DX

Job Description

As a consultant, you should be an expert of handling AngularJS Developer responsible for the client side of our service. Your primary focus will be to implement a complete user interface in the form of a mobile and desktop web app, with a focus on performance. Your main duties will include creating modules and components and coupling them together into a functional app. The artistic design will be delivered to you, together with a few HTML templates, but we will ask for your help in regard to animations, CSS, and final HTML output. You will work in a team with the back-end developer, and communicate with the API using standard methods. A thorough understanding of all of the components of our platform and infrastructure is required.

Responsibilities:

Delivering a complete frontend application

Designing and developing user interfaces using AngularJS best practices

Ensuring high performance on mobile and desktop

Writing tested, idiomatic, and documented JavaScript, HTML and CSS

Cooperating with the back-end developer in the process of building the RESTful API

Communicating with external web services

Developing application codes and unit tests in AngularJS, Java Technologies, and Rest Web Services.

Ensuring high performance of applications and providing support

Skills:

Experience with AngularJS, TypeScript, Node.js, JavaScript (ES6), HTML5, SCSS/LESS

Proven experience implementing front-end and back-end JavaScript applications.

Professional precise communication skills

Familiarity with Agile/DevOps methodologies

Knowledge of JavaScript MV-VM/MVC frameworks including AngularJS.

Deep knowledge of AngularJS practices and commonly used modules based on extensive work experience.

Creating self-contained, reusable, and testable modules and components

Ensuring a clear dependency chain, in regard to the app logic as well as the file system

Ability to provide SEO solutions for single page apps.

Thorough understanding of the responsibilities of the platform, database, API, caching layer, proxies, and other web services used in the system.

Validating user actions on the client side and providing responsive feedback

Writing non-blocking code, and resorting to advanced techniques such as multi-threading, when needed

Creating custom, general use modules and components which extend the elements and modules of core AngularJS.

Experience with building the infrastructure for serving the front-end app and assets.

Writing extensive unit tests using automated TDD tasks

Creating configuration, build, and test scripts for Continuous Integration environments.

Experience using JavaScript building tools like Gulp or Grunt.

Critical thinker and excellent problem-solving & debugging skills.

Personal

Besides the professional qualifications of the candidates, we place great importance in addition to various forms personality profile. These include:

High analytical skills

A high degree of initiative and flexibility

High customer orientation

High quality awareness

Excellent verbal and written communication skills
