

Data Analyst F/M/X

[Apply Now](#)

Company: Amaris Consulting

Location: Belgium

Category: computer-and-mathematical

Job description

We are seeking a Data Analyst to join our team at Amaris Consulting in Belgium. In this role, you will be responsible for interpreting data and turning it into information which can offer ways to improve a business, thus affecting business decisions. You will gather information from various sources and interpret patterns and trends.

Your Responsibilities:

Analyze large datasets while managing and coordinating with different stakeholders.

Perform regular quality control checks on data, including resolving any discrepancies.

Create clear reports that identify consistent trends and propose actionable insights based on available data.

Work closely with management teams to understand their needs and provide appropriate solutions using statistical tools.

Maintain databases by acquiring new data from available sources, ensuring the integrity of the database is not compromised.

Develop protocols for handling, processing, and cleaning datasets.

Collaborate with IT teams to set up secure systems for protecting sensitive company information.

This position offers a unique opportunity to develop your analytical skills while working in a dynamic environment within an international consulting group like Mantu.

Your Profile:

You are an ambitious individual who has recently graduated or started your career journey in the field of Data Analysis or related fields. Your ability to analyze large volumes of complex data sets makes you stand out among others. You have excellent attention-to-detail skills along with strong communication abilities that help you explain technical concepts effectively across all levels within the organization.

A degree in Mathematics, Computer Science or Statistics is required; master's degree would be considered as a plus point but not mandatory.

Possess knowledge about RDBMS (Relational Database Management System) like SQL Server/Oracle/MySQL etc.

Familiarity with statistical software (e.g., SAS, SPSS) and data visualization tools (e.g., Tableau).

Strong analytical skills with the ability to collect, organize, analyze and disseminate significant amounts of information with attention to detail and accuracy.

Adept at queries, report writing and presenting findings.

Excellent verbal and written communication skills in English are essential for this role. Knowledge of other languages would be an added advantage.

Advantages:

An international learning environment

Extensive training and certifications.

A R&D laboratory where you can develop your skills on innovative projects.

The opportunity to bring new ideas to develop a thriving business.

Individual coaching and mentoring, as well as the chance to learn from experts for your professional and personal growth.

An attractive, tailor-made, and evolving career path.

We are an independent company that values:

Agility: thrive in a flexible, dynamic, and stimulating environment.

International scope: enjoy daily international exchanges and numerous mobility opportunities in over 60 countries.

Intrapreneurship: engage in related topics or develop your own Business Unit.

Attentive management: with a limited number of consultants, your manager will adapt to your profile and support you throughout your professional journey.

Amaris Consulting is proud to be an equal-opportunity workplace. We are committed to promoting diversity within the workforce and creating an inclusive working environment.

For this purpose, we welcome applications from all qualified candidates regardless of gender, sexual orientation, race, ethnicity, beliefs, age, marital status, disability, or other characteristics.
