Company: NTT DATA

Location: Brussels

Category: computer-and-mathematical

About us

NTT DATA – a part of NTT Group - is a Top 10 global IT services provider, headquartered in Tokyo, with over 190,000 employees.

We deliver **consulting solutions** by combining specialized sectorial knowledge, our transformation management skills, and our large technology expertise (data, RPA, AI, low code, cloud, IoT, virtual reality), to keep our clients, as well as society, a step ahead in this digitally dynamic world.

Everything we do is underpinned by **core values** of 'Teamwork', 'Foresight' and 'Clients First'. Our shared **leadership principles** of Collaboration, Engagement and Curiosity help us build a community where our people are equipped with the best resources to face new challenges.

We are looking for **Data Analytics Manager** to join our **Data&Analytics** team in **Brussels** to bring DNA to the next level, focusing on business development, working closely with our local and near-shore team, and offering disruptive services in the Data&Analytics field.

Your role:

Engage with our customers to conceptualize their needs in a business solution, generating proposals consistent with their needs and aligned with our expertise area, optimizing the allocated resources, taking advantage of all our productive models combining on-shore, near-shore, Excellence Centers and more.

Ensure the correct execution of the consolidation and growth strategy of the Data Analytics practice in Benelux&France, engaging with our partners, being active on notoriety actions and

sharing all our innovation. Lead the development and evolution of the Data and Analytics practice, with special focus on AI, towards efficient performance, teamwork and guiding the people of the team in the integral development of competencies for their current position and growth.

Ensure, with proactive participation, the execution of contracts and projects, guaranteeing quality in delivery, profitable operations and in accordance with the parameters committed towards the client and internally.

Management of a team of around 15-20 people.

Economic management of the business line and its projects.

Management of multidisciplinary relationships with NTT Data Group, with business and other operational areas.

. Requiriments:

Your profile:

Consolidated experience in IT Consulting over 10 years, having held management or management positions in a consulting company or end client.

Experience in business development and project management in the field of Cloud Data, specifically with the main Hyperscalers (AWS, Microsoft or Google) and with AI technologies such as ML/DL, NLP and LLM.

Development and management of teams and their career plans.

Dialogue with C levels or area directors of data or architecture.

Fluent in English and Dutch or French
