

Data Consultant (NL)

[Apply Now](#)

Company: KPMG

Location: Brussel

Category: computer-and-mathematical

Position description

Job title

Data Consultant (NL)

Function

Advisory - Senior Advisor

Roles & Responsibilities

Our KPMG Lighthouse is growing!

The Belgian local Center of Excellence for Data, Analytics, Artificial Intelligence & Intelligent Automation is looking for (Senior) Data Consultant.

In that function, you will be part of challenging Data Transformations across various industries and:

You will analyze, define, implement and improve Data and AI strategies and processes to deliver solutions that allow to do more with the ever-expanding data assets of our clients.

You will support the assessment of organizations with regard to their current maturity for what data, analysis, AI and intelligent automation.

You will make sure you understand the market trends and strategic goals impacting our client's organization and embed it into our solutions.

You will help define approaches for data transformation projects and participate in their delivery (for instance as project stream lead or supervisor).

You will deliver analytically-informed, issue-based solutions that support our clients in making faster, better and smarter decisions that are in line with their strategy and regulatory constraints.

You will support the effective change in the organization following data-transformations.

You will participate in the development and implementation of our Data Strategy & Management capabilities.

Skills & Qualifications

In order to become a successful (Senior) Data Consultant at KPMG, we are looking for fast learners and critical thinkers with a broad view on data to be able to break down the data challenges faced by our clients. In addition you also feature the following qualifications:

You have acquired 3 to 6 years of relevant experience in a Data Strategy, Data Monetization, Data Management and Data Governance.

You know how AI & Analytics should be embedded into a broader data strategy, taking into account data governance and quality pre-requisites.

You are familiar with change management in the implementation of data strategies and feel comfortable with market trends and technologies related to Data, Analytics, AI or Intelligent Automation.

Having knowledge of compliance and regulatory requirements, which have a direct impact on the data requirements (e.g. GDPR, BCBS239 or AnaCredit in Banking, Solvency II in Insurance, etc) is a plus.

You have experience with project management methodologies & agile delivery approaches.

Having certifications in the Data-sphere is a plus (e.g. Certified Data Management professional (CDPM), CIP, CMMI DMM, etc).

You are a fluent communicator Dutch and English (spoken and written), knowledge of French is a plus.

We offer

A corporate culture in which personal growth, mutual trust and lifelong learning are being fostered.

An inclusive workspace that encourages diversity and pursues mutual respect for each other's beliefs and background.

Professional experiences in an international and dynamic working environment with inspiring colleagues.

Flexible, hybrid work arrangements to enable working on different locations: home office, on-site or on the go.

A wide range of teambuilding activities and social events that enable new joiners to meet colleagues within the wider KPMG community and have some fun along the way.
