

## Data Engineer

[Apply Now](#)

Company: DEME Group

Location: Belgium

Category: computer-and-mathematical

### Summary

At DEME we believe in the value of data and becoming data driven. As a Data Engineer you will join the Data & Analytics Office (DAO) within the IT Services department. Together with the team you will be transforming DEME's data into high quality (BIG) data sets and reports. You will enable our businesses to gain insight in their data so they can support their decisions with facts. You will be working with various kinds of data on multiple projects.

You will be creating, maintaining, and supporting data pipelines with information coming from our vessels, projects, campaigns, third party data services, and so on. You will play a key role in developing and maintaining data models and designing modern data solutions and products on our cloud data platform.

You will work closely with the business to define & finetune requirements. You will support our data scientists and report developers across the organization and enable them to find the required data and information.

Your responsibilities

Your profile

Our offer

You will create, maintain and support data pipelines.

You will take care of the design and maintenance of data models, together with the team.

You'll architect data solutions and develop a roadmap for the data & analytics landscape.

You will create and/or improve our reporting standards.

You'll provide the data analytics team the right tools and framework.

To gather all necessary details and define requirements for the business, you will collaborate closely with data engineers, data scientist and report developers.

You will be working cross departmental on various data driven projects and enable our business, together with the team to create value by using data.

You will be working with on-premises as well as cloud-based data architecture and technology and help shaping this modern data landscape.

You have a result-driven and hands-on mindset and prefer to work in an agile environment.

You are a team player and good communicator.

You have experience with SQL or other data-oriented development languages (Python, Scala, PySpark, etc.). You have experience with UML modelling and ER modelling.

You are familiar with the concept of data pipelines and have some development experience on them.

You have a master or bachelor's degree in the field of engineering or computer science.

You like to iterate quickly and try out new things.

Ideally, you have experience with a wide variety of data tools & data like geospatial, time series, structured & unstructured, etc.

Experience on Microsoft Azure is a plus.

Experience with machine learning and AI is a plus.

Experience with reporting tools is a plus (Grafana, Power BI, Tableau).

Having a healthy appetite and open mind for new technologies is a plus.

An extensive mobility program for a healthy work-life balance.

A permanent training track which allows you to develop yourself personally and professionally.

A stimulating, innovative workplace with numerous growth opportunities.

A people-oriented environment with an interactive health program and a focus on employee wellbeing.

#### **Contract Manager**

Als ervaren contractmanager binnen TM ROCO maak je deel uit van de dienst

Contractmanagement. Zo sta je in, in overleg en in samenwerking met het contractmanagement team, voor het opvolgen van het naleven van alle contractuele aspecten rondom het project. Werken als contractmanager bij TM ROCO kenmerkt zich door de diversiteit aan (deel)projecten, mensen, vraagstukken en problematiek. Je bent adviseur, onderhandelaar, beslisser en probleemoplosser in één. Dit vereist een optimale communicatie met de verscheidene diensten en teams binnen de organisatie van TM ROCO, evenals een correcte communicatie naar onderaannemers en de klant toe.

### **Design Manager Foundations**

DEME is searching for a motivated Design Manager to reinforce the offshore wind foundation design team. If you are an experienced professional with relevant engineering expertise in the offshore structures domain, this is an excellent opportunity to join a dedicated team of engineers specialized in the successful delivery of design-build (EPCI) foundation and balance of plant (BoP) renewable energy projects, such as the innovative Saint-Nazaire and Arcadis Ost 1 projects. As a design manager, you will be leading the foundation design process of one of our offshore wind projects or tenders. Together, we work on DEME's vision of creating a sustainable future.

Offshore Engineering Belgium See details

### **Geotechnical Engineer**

As a Geotechnical Engineer, you will focus on a wide variety of challenges supporting our cable installation business unit on offshore windfarms. Your challenges will extend from multi-disciplinary cable route engineering to cable burial studies and managing complex soil datasets. You will be responsible for sound and expert output to support our project and tender teams or work on one of our many R&D projects.

The engineering department in Breda consists of approximately 30 employees. You will work in an international team of 8 Hydraulic and Geotechnical engineers. As a geotechnical engineer you will support our commercial and project teams by providing, amongst other things, expert advice on cable protection strategies and cable route design. Together with the team, you will help our society transition to a sustainable future.
