Data Engineer

Company: Klarrio

Location: Belgium

Category: computer-and-mathematical

We are looking for Data Engineers **!**

Are you passionate about cloud, big data, distributed systems and looking for new opportunities in the dynamic world of data engineering?

Do you want to join a fast-growing international company with big aspirations?

We, at Klarrio, are looking for engineers to take a crucial role in creating reliable production platforms.

You will be working on a wide range of projects in various domains such as Smart Cities, Transport & Logistics, Telecom, Innovative Technology Solution Providers, and Public Infrastructure. Check out some of our and .

You will be part of a team that delivers data platforms tailored to the needs of the client in an agile manner. The development of these platforms requires a multidisciplinary team consisting of developers who are not afraid to take initiative and have an eye for quality. **We believe in our in-house synergies between team members to create the best possible solution for our customers. Therefore we always work on a project basis and don't do.**

We are looking for IT professionals with a drive for getting things done with a willingness to help others be successful in their job and a knack for always being a step ahead.

You are a naturally collaborative person and eager to propose creative solutions to challenging problems.

As an engineer, ideally you possess the following qualifications:

Masters degree, or equivalent experience, in Computer Science or a related technical field involving software/systems engineering.

Programming experience in either Go, Java, Scala, JavaScript, or C.

Knowledge of computer networking (TCP/IP, Firewalls, DNS, SSL, …)

Understanding of Operating System concepts

Understanding of Unix/Linux operating systems

Basic understanding of database systems (SQL or NoSQL)

Extra assets are:

Hands-on experience with data processing frameworks such as Kafka, Spark, Flink, Storm,…

Expertise in designing distributed systems.

Hands-on experience with cloud platforms like AWS, Azure, …

Affinity with the Agile development methodology and concepts such as CI/CD

The key focus will always be system health, performance, reliability, and availability.

You would help with:

The Design, building, and testing of new services and extending existing services

Providing the necessary service metrics to be able to monitor the system.

Contributing to incident response and postmortems.

We offer a compensation package that contains a competitive salary, a phone with limitless subscription, performance bonuses, health insurance, retirement planning, meal vouchers, additional holidays, and a .

You'll be supplied with a high-quality laptop, dual-screen setup, and mobile phone. Our offices are located in the center of Antwerp (5-minute walk from central station) and equipped with standing/sitting desks, ergonomic office chairs, and free beverages/refreshments.

You'll be working in a technologically advanced environment with a broad variety of opportunities to improve your skills (technical puzzles, courses, certifications, regular and on-the-job training) in collaboration with highly skilled engineers. And perhaps the most important of all, you'll be able to do this with a bunch of like-minded individuals while enjoying one of our multiple yearly events.
