

## Data Protection Security Consultant

[Apply Now](#)

Company: Orange Business Services

Location: Evere

Category: computer-and-mathematical

### **The team, position & mission:**

We are looking for a Senior Security Consultant to reinforce our security team. As a Security Consultant, you use your practical knowledge on information security to help our client to implement security processes & tools. One of your key domains of expertise is Data Anonymisation, Encryption and Key Management.

### **Your key areas of responsibility as a Security Consultant:**

Implementation & configuration of data protection technologies (ex: PKI, cloud and on-premises based Key Vault, HSM, etc. ) on project where data anonymisation is required.

Security Architecture and analysis of technical requirements.

PMO: Manage, structure, and deliver projects, including redaction of the project charter, project objectives & tasks, required resources, business case, budget vs. expected benefits and timelines for completion.

Being an Ambassador: Being the face & voice of Digital Services Orange Business at our clients, establishing relationships with client stakeholders, being aware of client opportunities, risks & issues and communicating about it with your colleagues.

### **As an ideal candidate you have: (this should focus on requirements/experience):**

A Bachelor/Master's degree (Computer Science, Information Systems) or relevant professional experience.

Degree in cybersecurity is an asset.

Fluency in English and (French or Dutch is a plus)

At least 5-years' experience as a security consultant : Previous solid experiences in the implementation of several Information Security solutions with a focus on encryption and key management. Ability to model complex information systems; broad knowledge of security governance methodologies is mandatory; relevant certifications such as ISO27K Lead implementer, CISSP, CISM, or CISA is a differentiator.

Experience with cloud (preferably Azure or GCP). Cloud security certification is a plus (Ex: CCSP, Azure Security Engineer Associate or Google Cloud Security Engineer).

Relevant experience as a technical and functional analyst, in Project management in IT / IT Security domain.

Relevant experience in data management (data modeler, data analyst...) is an asset.

Knowledges of IT security infrastructure and systems (hardware, operating systems, storage, networking, firewalls, OSI model, OWASP Top 10...)

Practical knowledges of below technologies in data anonymisation, encryption, and key management systems (ie. Entrust; Opentext/Voltage, RSA,...); Active Directory; Patching & vulnerability management systems (Nessus, Qulays, WSUS...);

Learning attitude: Staying abreast of new developments in information security services and industry knowledge; Understanding of the evolving regulatory requirements and compliance issues related to your domain.

Excellent communication and presentation skills, both written and oral.

An Ability to perform translate complex topics in a clear, comprehensible communication to a broad audience
