Category: other-general

DATA STEWARDANALYST

You are responsible in bridging the gap between business and IT. We are interested in professionals having this unique experience with functional analysis in complex business and data environments. The ability to understand the client needs, participate in requirements gathering and functional analysis is fundamental to deliver effective data solutions.

You will be:

participating in and reviewing data diagnosis and assessment activities

driving and participating in functional and system requirements analysis

translating the business needs into technical requirements

Implementing data modeling design / review

Your qualifications are:

Practical functional knowledge of the following capabilities is required:

5+ years of working experience in data and functional analysis

5+ years of functional experience with data management platforms such as Collibra, Informatica, Alation, TIBCO, SAS, IBM... is a plus

an analytical and creative mind

solid organizational skills including attention to detail and multi-tasking skills

proven ability to deliver in time

preferably trilingual: English (requirement) and/or Dutch, French

good communication and presentation skills, both written and oral

strong interpersonal skills, such as being able to work in a team as well as autonomously

flexibility and ableness to work under pressure

hands-on mentality, despite functional focus of the job

willingness to travel in Belgium and potentially abroad

Your academic requirements are:

Bachelor or Master's degree

Datalumen is an equal opportunities employer.
