

Design Manager Foundations

[Apply Now](#)

Company: DEME Group

Location: Belgium

Category: computer-and-mathematical

Summary

DEME is searching for a motivated Design Manager to reinforce the offshore wind foundation design team. If you are an experienced professional with relevant engineering expertise in the offshore structures domain, this is an excellent opportunity to join a dedicated team of engineers specialized in the successful delivery of design-build (EPCI) foundation and balance of plant (BoP) renewable energy projects, such as the innovative Saint-Nazaire and Arcadis Ost 1 projects. As a design manager, you will be leading the foundation design process of one of our offshore wind projects or tenders. Together, we work on DEME's vision of creating a sustainable future.

[What we offer](#)

Lead the foundation design process aimed at delivering an optimal foundation solution considering the full project life cycle, stakeholder requirements, and Client's success criteria.

Manage an internal team of design and expert engineers for various design stages.

Interface with a multi-disciplinary team of engineers and specialists for solving complex project challenges related to the design, fabrication, installation, and operation of offshore wind farms.

Provide engineering expertise and advice to support the successful execution of our offshore wind foundation projects and tenders, including review of reports and drawings from third-party design consultants.

Perform conceptual development and high-level calculations of potential foundation design solutions.

Support the commercial tendering process by reviewing tender documents and providing technical support to contractual Client meetings.

Lead the selection and contracting process of third-party design consultants.

Initiate and maintain design management tools throughout various design phases, including a design time schedule, opportunity and risk register, design decision register, and design management plan.

Lead and/or support in a range of innovative internal research and development studies.

Academic degree in civil, mechanical, or marine engineering;

at least 5 years of relevant working experience;

team player demonstrating initiative and effective communication skills;

fluent in verbal and written English

An extensive mobility program for a healthy work-life balance;

a personal training journey which allows you to develop personally and professionally;

a stimulating, innovative workplace with numerous growth opportunities;

a people-oriented environment with an interactive health program and a focus on employee wellbeing.

Geotechnical Engineer

As a Geotechnical Engineer, you will focus on a wide variety of challenges supporting our cable installation business unit on offshore windfarms. Your challenges will extend from multi-disciplinary cable route engineering to cable burial studies and managing complex soil datasets. You will be responsible for sound and expert output to support our project and tender teams or work on one of our many R&D projects.

The engineering department in Breda consists of approximately 30 employees. You will work in an international team of 8 Hydraulic and Geotechnical engineers. As a geotechnical engineer you will support our commercial and project teams by providing, amongst other things, expert advice on cable protection strategies and cable route design. Together with the team, you will help our society transition to a sustainable future.
