

## Embedded Software Engineer (M/F)

[Apply Now](#)

Company: Akkodis

Location: Bruxelles

Category: computer-and-mathematical

### Position description

#### Category

OPERATIONS - ENGINEERING/PRODUCTION

#### Job title

Embedded Software Engineer (M/F)

#### Contract

Permanent contract

#### Job description

You are an engineer specialized in the development of embedded systems or a recent graduate in the field and you are looking for a great professional experience in an international environment ?

For different customers, global players in the transportation, energy and defense industries, we are currently looking for several software development engineers.

#### Your responsibilities:

Design of the software component control logic via a model-based approach (eg SCADE, Matlab Simulink, Labview), and the implementation of functional blocks (Embedded C / Linux);

Development of middleware components and integration (embedded C, POSIX API, multithreading);

Verification & Validation, in charge of verification (required, design, code) and tests (C & Python languages);

Computer Vision: in charge of algorithm development (C ++);

## **Business Industry**

Defence

## **Profile**

Engineering degree in computer science or electronics.

A proven experience of 4 to 10 years in the development of embedded systems, preferably for critical real-time systems.

Proficiency in C / C ++ and Python languages; development experience in the Linux environment.

Knowledge in the development of real-time systems.

Knowledge of Matlab / Simulink for the model part.

Knowledge of electronics appreciated.

Autonomy, motivation, teamwork.

Fluency in French and English.

## **Position location**

### **Job location**

Europe, Belgium

### **Location**

Avenue Jules Bordet 168 1140 Bruxelles

## **Candidate criteria**

### **Minimum level of education required**

7. Engineering Degree

### **Diploma specialisation**

Electronics

### **Level of experience**

5 to 10 years
