SII Belgium is currently seeking an Embedded Software Engineer with a focus on aerospace & defence to join our team.

Responsibilities:

Design, develop, and maintain embedded software for aerospace systems

Work with cross-functional teams to define and implement software requirements

Collaborate with hardware engineers to ensure proper system integration

Participate in code reviews and maintain software documentation

Troubleshoot and debug software issues.

Requirements:

Experience with real-time operating systems and embedded systems

Strong knowledge C /C++ language, Python , and practice of one assembly language

Experience with micro-controllers and development without operating system

Experience in development of FPGA using VHDL and communication systems

Strong analytical and problem-solving skills

Experience in digital electronic design is a real plus

Fluent in English and French

Master's degree in Computer Science with embedded specialty, Electrical Engineering, or a related field

Minimum of 1/2 years of experience in embedded software development

We offer:

A challenging and varied role in a growing company

Opportunity to work with the latest technologies

Competitive salary and benefits

Opportunity to improve your skills and knowledge through training and certification

Warm and open company culture, supported by an international group

If you are passionate about embedded software development and have a desire to work in aerospace, we would love to hear from you!

Apply now and become part of our dynamic and driven team at SII Belgium!
