SP Schoolhouse

Position Summary

The primary purpose of this role is to develop optimized maintenance strategies for plant equipment based on FMEA and other reliability methodologies, facilitate root cause failure analysis, recommend design changes determined by RCM studies, prioritize, and eliminate defects, develop critical spare parts lists, determine, understand, and manage asset risks. The Reliability Engineer leads the site's reliability network and ensures that the initiatives are progressing.

Responsibilities

Asset risk management - Support the leadership team in managing existing and potential risks in order to achieve the strategic objectives of the organization regarding health, safety and environment (HSE), equipment capacity, quality, productivity, and maintenance costs.

Loss elimination (defects) - Determine the means to reduce losses using data from production losses (reliability and availability), failures, breakdowns, and asset maintenance

costs.

Managing the asset life cycle - Determine the strategies to achieve minimum life cycle cost for the asset.

Qualifications

Bachelor's degree in electrical or mechanical engineering preferred.

Proficiency in Business Improvement (Lean – Six Sigma) preferred.

Proficiency in “Reliability Centered Maintenance” analysis and facilitation (RCM) preferred.

Benefits

Variable Compensation Eligible

Relocation assistance

Medical Insurance

Prescription Drug Benefits

Dental Insurance

Vision Insurance

Life Insurance

Disability Insurance

Critical Illness Insurance

401(k) Retirement Savings Plan

But most importantly, if you embrace our core values, and if this role sparks your enthusiasm to apply your passion to contribute in a meaningful way as a part of Sibelco's team of unique talents within a diverse international business community, then we very much look forward to hearing from you.
