Designing architectures both on the cloud and on premises (whether hosting or cloud on-premises) or combination of both (hybrid). Gathering business requirements. Designing ETL processes. Data virtualization. Data modelling. Design and development of reporting applications Physical DB design. DB performance analysis Design of

Data Quality and Health Monitoring processes. Elaboration of test programs. Writing of technical documentation. Assistance with deployment and configuration of the system. Participation in meetings with other project teams.

YOUR SKILLS AND EXPERIENCE

Following specific expertise is mandatory for the performance of tasks: At least 4 years of experience with Microsoft Power BI (Power BI Desktop, Power BI Service, Power Query M language, Data Analysis Expressions (DAX) ...) At least 3 years of experience with ETL processes using SAP DSA At least 4 years of experience with dashboard UI/UX design At least 4 years of experience with SQL. Excellent knowledge of data warehouse design & architecture. Good knowledge of data lake/data lakehouse design and architecture. Excellent knowledge of relational database systems applied to data warehouse Knowledge of non-relational database technologies. Excellent knowledge of SQL. Excellent knowledge of business intelligence reporting tools. Excellent knowledge of ETL tools. Excellent knowledge of modelling tools. Excellent knowledge of online analytical data processing (OLAP) and data mining tools. Knowledge of near real time data warehousing and/or change data capture technologies. Good knowledge of cloud-based business intelligence design. The following certificate is required for the performance of tasks: Microsoft Certified: Power BI Data Analyst Associate. Due to the particular nature of a large international organisation such as the European Commission, candidates should also have the following non-technical skills: Capability of integration in an international/multicultural environment, rapid self-starting capability and experience in working in team Ability to work in multi-cultural environment, on multiple large projects Ability to participate in multilingual meetings. Excellent Team Player Ability to work with a high degree of rigour and method and, more specifically, to follow naming conventions and coding standards Ability to understand, speak and write English and French High degree of discretion and integrity is required as the applications managed and maintained contain personal and confidential data

EXTRA INFORMATION The services shall be performed in Brussels, Belgium in Hybrid mode (remotely, but within 2h drive) Both employee and freelance contract International environment The competence level will be tested during interview. In case the information about the competence level filled in the CV are not true, this may lead to refusal of candidate. Please note that, due to the sensitive nature of the data involved, this position is currently available only to individuals who meet the following criteria: EU Citizens Non-EU Citizens already based in Belgium with a valid work permit

Once we receive your CV, we will take time to evaluate it carefully. Should there be a match for this or any other position at Etinars, we will be in touch with you. In case there is no match now don't

worry, we will make sure to keep your CV in consideration for future vacancies! In Etinars we are committed to supporting Diversity and Inclusion Community. If you identify as part of it and you meet the minimum criteria for the job, you will be given the opportunity to demonstrate your abilities at an interview.
