

## Field Service Engineer - Industrial compressors & cooling EMEA

[Apply Now](#)

Company: Manpower BE

Location: Zaventem

Category: computer-and-mathematical

### Client Description:

Passionate about technology? Then Manpower Specializations is the place to be!

Through our knowledge of the market, specialisation and personal dedication we search together with you for a new technical challenge that matches your expectations and competences.

Through our recruitment and selection division you start immediately with a permanent contract at our client.

**For our client, one of the leading companies for industrial refrigeration packages and gas compressors in the European market, we are looking for a Field Service Engineer.**

### Job Description:

You keep compressors, heat pumps and complete cooling solutions in perfect condition by performing maintenance mainly in the workshop in Zaventem as well as on site at clients in EMEA. (mechanical work)

You are responsible for the commissioning of all these products and you perform interventions to inspect and repair them.

You support customers by offering tailored technical solutions.

### Candidate Profile:

Through a training in mechanics or through relevant experience, mechanics have no secrets for you.

You are representing the company. Contributing to customer experience is evident to you.

You get satisfaction from finding technical solutions.

You communicate fluently in English. You have an advantage if you also master French or Dutch.

Travelling doesn't scare you.
