

Fleet Solution Manager – Robotic Systems Development

[Apply Now](#)

Company: KION Group

Location: Antwerp

Category: other-general

Automation is your passion, you see yourself as a central figure in bringing next generation thinking the supply chain industry. Warehouse automated solutions are your strength. You are capable in defining features and associated business value with respect to end to end solutions including traffic management, user interface, agv, amr, and autonomous vehicles. You enjoy the journey as much as the destination. You enjoy managing a broad portfolio of products at different stages of their product lifecycle from sunrise to sunset.

Product Classifications include:

§ Forklift

§ Unit load

§ Tow / Tug

You manage the existing and future warehouse solution landscape at the feature level, interfacing with Product Managers of STILL, Linde, and Dematic to create a scaled approach to product launch and product retirement.

You are data driven, balancing the technology and capabilities against business value both by business unit and global region.

You report to the Director of Solution Management as a part of the Robotic Systems Development (RSD) group within KION's Central Technology Organization (CTO).

What we offer:

The opportunity to work in a fast growing technological company

An international environment

Flexible working hours

The ability to work from home (40%)

An attractive salary package (car, meal vouchers, insurances,...)

36 vacation days

Tasks and Qualifications:

Key Responsibilities:

- Strong interaction with KION's Operating Units sales and product management representing the voice of the OUs for the agile release train (ART). Be the link between RSD Automated Systems (Product Owners / Validation) and our internal customers ("the Operating Units").
- Understanding market needs and translating them into strategic roadmap is key. Aligning this roadmap to internal / external stakeholders.
- Organizing and ensuring the transfer of innovation into the product/project groups according to KIONs core strategy and requirements of individual OUs underpinning advanced intercultural leadership and willingness to do international travel (20%).
- Ensuring timely and accurate reporting of department performance and project performance. Creating and maintaining the RSD solution roadmap for Software & Data, Connectivity, and Machine / Device level products.
- In collaboration with the architects, define and maintain the Nonfunctional Requirements (NFRs) to help ensure that the solution meets relevant standards and other system quality requirements.
- Manage and prioritize the flow of work through the program Kanban and into the program backlog ensuring the availability of sufficient features ready to deploy in the backlog at all times.

Education

· Ph.D. or Master degree with a technical focus preferred. Additional economic degree desirable (MBA).

Experience & Skills

- Strong team and collaboration skills.
- Effective communication skills with the ability to properly communicate to a variety of audiences.
- Experience executing effort in a Scrum framework.
- Ability to understand the customer(s) point of view, and how that guides the project's requirements.
- Eagerness to guide a team to their goals.
- Action-oriented with a positive & engaging energy.
- Understanding of the fundamentals of iterative development.
- Technical ability in mechatronics or software development.
- Practical experience in automation and robotics is necessary. Affinity with AGV / AMR is highly required. Mobile automation should make your day!
- Fluent in English language (additional languages such as German, Dutch, Chinese, or French are a plus)
- Leadership responsibility within cross-functional multi-disciplinary teams of a global matrix organization
- High ability to think and act entrepreneurially considering risk and opportunity analysis to compile decision proposals
- Experienced within global project business and execution
- Team player with exceptional interpersonal skills, such as communication and analytical skills and the ability to lead a global high performing team
- Willingness to go the extra mile to anticipate, understand and respond to customer's needs

Direction of others

· Typically, direction of tasks and coordination of teams along with team leads. No direct reports.

Key Working Relationships

· Primarily intra-organizational contacts.

Travel

20% (Including international)
