Discover how we can give a sense to your passion on

About The Job

As a full-stack developer:

You analyse the business/functional requirements and translate them into a technical design

You design and develop code both front-end and back-end, according to certain specifications, analyses, evaluations, tests & debugs

You use frameworks as Spring and Hibernate daily

You are involved in the full development life-cycle

You assist in resolving production issues & develop alternative approaches

You write and update technical documentation

About You

You hold a Master's degree in Computer sciences, software engineering or similar

You have at least 2 years of strong experience in the development of applications using Java

and Angular/React

You are aware of different development methodologies, different programming languages and frameworks for web or desktop applications

You have excellent command of English and Dutch or French

You have strong communication skills and are not afraid of new challenges

About us

Nalys is a people company. We will give you the opportunity to challenge yourself while doing something you love. So, whether you are a creative, a dreamer or an achiever, you can find a way to do something you truly enjoy. And because we want our company values to be more than words, we invest 7% of our annual revenue to drive innovation, develop your expertise, train your brains and give you time & tools to think big.

Feel free to send your application to
