Bru Textiles

We are one global team, with colleagues, partners, and customers all over the world. Bru sets the soft furnishing textiles industry standard for innovation in operations, digitalization of the business, and hybrid working. To realize this, we keep on investing in lifelong relationships with, and growth of all team members. We aim to be a Forever Company by remaining the leading tech company in textiles, and with a responsible sustainability strategy. Team spirit and intrapreneurship sit in our veins, with the customer at the heart of everything we do.

Function:

We are looking for a **functional analyst with team lead skills** for the **design and optimization of two major in-house developed software systems** of Bru Textiles; The Warehouse Management System and the Digital Asset Pipeline (a system for automated mass production of 3D renders for marketing purposes). Your key responsibilities and accountabilities:

Do functional requirements analysis for the Warehouse Management System and the Digital Asset Pipeline: work with the Solution Architect on the big picture requirements and priorities do UI and UX design write detailed, clear, and sufficiently technical user stories for the development team maintain and refine the product backlogs in detail

Understand the relevant business areas (warehouse operations and digital innovation tracks): analyze the current processes, procedures, and systems

Take the lead in ensuring new software changes are documented and tested properly before being released work with both the development team and the relevant business key users to achieve this write documentation or ensure key users write documentation where needed.

Apply and follow the team's agile approach to software development

Be a sounding board and right-hand for the Solution Architect, to whom you report.

Skills and experience:

Strong overall **analytical capabilities**

Stress-resistant, hardworking, and aiming for a high standard

Able to work independently

Proven experience in **functional requirements analysis**: UI design; design of new functionalities, user story writing, UML/XML; user mapping,

Proven **experience as a software engineer or software architect** : be familiar with software development concepts, able to understand the technical architecture of a software system (Java / React knowledge a big plus)

Experience in the following areas is a big bonus: knowledge of 3D rendering & modelling / knowledge of Warehouse Management systems

You are:

a go-getter with a clear focus on results

a decision maker with a positive assertive communication style and a proactive approach

an independent worker with an entrepreneurial mindset

you have an analytical mindset with a keen eye for detail

you can set priorities and work in an organized way. You take responsibility for what you do

What Bru can offer you:

competitive salary

company car

insurance (hospitalization + group)

laptop, mobile phone, internet subscription

meal vouchers

20 vacation days + 6 ADV days

bonussystem

flex working (4 days of home office per week)

the possibility to develop & structure further a newly created function within Bru Textiles

strong involvement in team decision making and leadership through close collaboration with the Solution Architect, Operational Leads, and Tech leads

working on interesting and innovative projects and products

the support of a highly qualified & experienced IT team of +/- 30 co-workers

the chance of working with both business (multiple departments) and IT

the possibility to work for a trendsetter and digital leader in the domain of interior furnishing fabrics
