Global Flavorist Trainee Program

Louvain-La-Neuve, Belgium

On-site

This program offers you the opportunity to develop new skills and experience through hands-on training in various aspects of the flavor creation process, knowledge building about the different analytical tools used, and learning about the impact of technology in this field.

At dsm-firmenich, being a force for good is not optional. Diversity, Equity & Inclusion is a shared responsibility woven into our daily work to not only benefit our People, Customers & Communities but also drive business value. Equal access to opportunities is a given, belonging is a shared feeling, authenticity is celebrated.

Your Key Responsibilities

Master on-the-bench flavor creation and design in line with our Good Creative Practices.

Acquire a robust understanding of manufacturing, analytical and quality capabilities paired with basic research and food science understanding.

Work on concrete and supervised creation cases and understand the various challenges that may be encountered whilst creating.

Learn and practice our state-of-the-art creation, project and portfolio management tools aligned with our digital transformation strategy.

Acquire a perfect understanding of your market and its key categories.

Successfully pass all the regular checkpoints including a final defense at the end of the 2 years of training.

We bring

An exciting 2 Year Flavorist Apprenticeship Program comprising 10 Months in our Center of excellence in Switzerland and 14 Months in your home affiliate.

Courses with top-class instructors including Master Flavorists and industry-renown partners.

A broad curriculum comprising all the aspects of the métier.

Culture that values diversity where people are at the heart of the company.

Opportunity to work for a company that cares about the environment, sets, and achieve ambitious sustainability objectives.

A Junior Flavorist position if you succeed at the end of the apprenticeship.

You bring

A minimum of a two-year university degree in chemistry, food chemistry, food technology, food science, or broader chemical engineering and science degrees.

Creative and Innovative with an above-average sense of taste and smell.

Intuitive with an innate curiosity and genuine interest in Food and Beverages.

Good technical understanding of chemistry and physical chemistry.

Effective Teamwork and productive working relationships in a multicultural environment.

Fluent Professional English.

Our recruitment process
