

Informatiker/in, Data Scientist

[Apply Now](#)

Company: HUK-COBURG Versicherungsgruppe

Location: Antwerp

Category: computer-and-mathematical

Big Data, PyTorch, Cloud Computing, KünstlicheIntelligenz, Python, Machine Learning, Datenerfassung,scikit-learn, Telematik, Data Science, Informatik

Data Scientist in Telematics (f/m/d)

Full-time, starting immediately in Coburg,permanent

The future of motor insurance isreal-time data collection with telematics. We believe thattelematics offers great potential for more accurate and, above all,fairer risk assessment. However, exploiting this potential is nottrivial and requires a spirit of research and, above all, a highlevel of expertise in big data & data science.

We live and breathe big data: as Germany's largest motorinsurer, we receive high-frequency driving data from our telematicscustomers every day, covering a distance equivalent to 300 timesthe circumference of the earth. In order to exploit the fullpotential of this complex and multi-layered data, we use thecomplete toolbox of a data scientist, from mathematical-statisticalmethods to state-of-the-art AI.

What you canlook forward to

Research anddevelopment for risk assessment with telematics driving data usingdata science methods

Design and developmentof complex software solutions based on machine learning algorithms

Technical support for the productive implementation of machine learning models

Ad-hoc analyses from ongoing operations

Teamwork in a motivated and agile team as well as overarching cooperation with related departments

What you bring with you

Very good degree in computer science, physics, mathematics or a comparable subject, preferably with a doctorate

Independent and scientific way of working with creativity and commitment

Experience in dealing with modern machine learning methods and relevant libraries in Python (Scikit-learn, PyTorch ...)

Experience in the design and development of big data applications

Understanding of the principles of software frameworks for distributed scalable systems and cloud computing is an advantage

Strong communication skills, mathematical and technical understanding and a goal-oriented and results-oriented way of working

Enjoy working with physical and technical data

What we offer you

Flexible working: As part of our hybrid working concept, you can work from home, on the road or at our headquarters in Coburg.

Competence: We promote your consistent professional development in the form of training courses, conferences and anything else that will help you progress.

Creative freedom: We trust your abilities and give you the space to drive forward your own ideas and solutions.

Performance-related remuneration: We recognize and value your contribution to the company's success and let you share in it.

Security: With the strength of our tradition, we focus on success and offer you security.

Have we piqued your interest?

Then apply now!

If you have any questions, please contact Ms. Malina Gorny

at the telephone number +49 9561 96-131 15, karriere@huk-coburg.de.
