Integration Consultant

SAP, software development, some experience, consultant Belgium share on

Not many people truly understand how important integration is – but you do.

You like integrating IT systems and streamlining processes, but not without first checking whether it actually makes sense to connect things. You're a **tech lover with a critical eye** – someone who'll build logic bridges only.

You know IT integration can be complex, but is vital for an organization's business-critical applications to play together nicely. In a way, you align people, processes and tools!

. Are you eager to join a dynamic and international **team of integration experts** and learn more about integration? Then we have just the spot for you!

Apply for Integration Consultant!

Thank you for your application.

We will get back in touch with you soon! Have a great day!

read our stories

Who are we?

Many organizations are caught up in a jungle of systems, technologies, apps, tools and more.

When they can't see the 'IT wood' for the trees any more, that's where we come in. We

are the SAP Integration team. Thanks to us, delaware can justifiably call itself the **undisputed market leader in SAP integration** . Our job is to make sure our customers tackle integration in a sustainable and strategic way, as we guide them through the integration challenges they face, from the architecture and implementation, to the technical support. We really believe event-driven architecture is the way to go and orchestrate projects from beginning to end.

We **dare to question** approaches that have been followed for a long time, and want to make sure that our integration architecture and methodology is scalable and flexible – which is what the market requires. We strive to deliver **high-quality and future-proof solutions** to automate and innovate our customers' digital transformation processes and initiatives.

We love sharing our **knowledge** with colleagues, customers and students. Did you know we teach integration classes at VIVES and Erasmus Brussels University of Applied Sciences? And that we work together with integration teams all over the world?

Just so you know: delaware has its offices in **Antwerp, Ghent, Kortrijk, Lummen, Liège** and **Wavre** , but we also spend a lot of time working together with our customers **on-site**.
