Great teambuilding, sport & wellbeing initiatives through our Together@KPMG program.

An inclusive workspace that encourages diversity and pursues mutual respect for each other's beliefs and backgrounds.

#Energy

#Technology

### **Location**

Zaventem HQ

### **Skills & Qualifications**

You hold a master's degree and have at least 3 years of experience in operating projects with a focus on technology / digitization within the energy and natural resources sector (Electricity - Gaz / Water - Sewage)

Ideally, you have thorough experience in:

Digital Transformation;

Project management with technology / digital links;

Process management within energy organisation (scrum & agile experience is a plus);

Business related topics and how to put them on the technology / digital agenda;

Pro-active mindset, dynamic and flexible to work within a fast-paced environment;

Fluent communication and facilitation skills in Dutch **or** French, and English required;

Excellent interpersonal skills and change management mindset;

Business affinity in any of the following would be a plus (non-mandatory): cyber and privacy, cloud and/or data management, data analysis GIS, SAP, Coding

### **We offer**

Define the digital answer to the business and technology challenges of Energy and Utilities companies. This by combining Utilities business insight with experience in technology implementations.

Manage projects, including the responsibility of planning, resourcing, and delivery; guide

the team in every phase of the project and ensure the delivery meets client expectations.

Grow and design relevant technology related offerings for the Energy industry, leveraging the existing KPMG technology solutions. Follow-up on trends and sector evolutions and engage in networking activities & organization of events.

Help grow the energy sector team through coaching and mentoring team members and sharing knowledge and experiences.

Work closely with other KPMG business units and develop an internal network.

### **Sample of assignments**

Data management & architecture setup increasing network insight for asset & works management as well as customer insight

Consumer & billing process definition / improvement for business effectiveness on SAP

Analysis & improvement of a project on the core architecture of an Energy company (microservices based Cloud setup)
