Company: BESIX

Location: Belgium

Category: architecture-and-engineering

### Job Description

To reinforce our growing plant & equipment department, we are looking for a motivated Junior Plant & Equipment Engineer. The BESIX plant & equipment department manages, maintains and repairs a large fleet of capital equipment for civil construction as well as a large fleet of foundation machines.

#### Your role:

You will take on the organization of the mobilization and demobilization of the equipment for our international projects;

You are in support for the execution teams on site and the methods department;

Within the team of the plant department you will proceed to the technical and administrative follow up of our equipment fleet;

After an initial start-up period you will gradually take on more responsibilities;

Your workplace is located in Brussels (BESIX HQ), but with regular visits to inspect our equipment on our international projects will be required;

You offer back office support to the international equipment department;

### Qualifications

You are in the possession of a master degree (industrial or civil engineer specialized in mechanics or electro-mechanics). You have a first relevant work experience;

You have a very good knowledge of English and Dutch or French. Any additional language is an asset;

You have a passion for technics, machines, engines...

You are persevering, enthusiastic and entrepreneurial, combined with a strong sense of responsibility;

You are a fluent communicator and are capable of transmitting your ideas/thoughts in a clear way;

**You are willing and flexible to travel around the world with missions abroad with a duration up to 1 month.**
