Your Impact

We're a rapidly expanding company on the lookout for individuals eager to join us in driving our growth. If you're enthusiastic about Natural Language Processing (NLP) and cutting-edge technologies, we want you on our team to take on thrilling projects centered around NLP techniques and Large Language Models (LLMs).

As an accomplished Data Scientist specializing in NLP and LLMs, you'll be at the forefront of developing and implementing advanced NLP solutions. Your role will involve bridging the gap between emerging technologies and business needs, all while offering guidance and mentorship to colleagues and clients in your areas of expertise.

Do you possess innovative ideas to join our Data Science team in delivering data-driven solutions to our customers, leveraging the most recent machine learning models and deep learning algorithms? Come join us as we embark on this exhilarating journey of growth and technological advancement.

Where you're going to get started

As a Data Scientist, you will dive into the world of artificial intelligence. You will apply your skills to real scenarios and in different domains, such as drug discovery in healthcare, building RAG-based LLM-applications and more.

This is you

You have a master's degree (or equivalent through experience) in a field that is highly data-driven (computer science, statistics, AI, etc.).

You have experience with modern computer vision and image recognition tools or platforms to

develop and implement solutions related to image classification, object detection and tracking, semantic and instance segmentation

You are an expert in working with LLMs (GPT, BERT, etc.).

You are familiar with NLP and LLM evaluation metrics.

You have an advanced level in Python

You approach problem-solving with an open-minded and constructive attitude.

You have the drive to stay up to date et the fast-changing NLP landscape

You are fluent in Dutch or French and in English

Benefits

You contribute to challenging projects at top international and Belgian companies in diverse sectors

You work in a high-tech environment with a focus on knowledge and innovation, an open no-nonsense business culture with space for personal initiative

You keep your technical and social skills up to date at our Ordina Academy you are supported in obtaining certificates

You receive a competitive salary package with additional benefits such as a company car, laptop, insurance package, luncheon vouchers, expense account etc.

You can take part in fun business and team building activities

Everyone is welcome to apply. Because we believe in the power of diversity and value inclusion. After all, the best ideas and smartest solutions arise in diverse teams. That is exactly why we pay so much attention to the composition of our high performance teams. So that you feel at home and can get the best out of yourself.
