

Manager, Statistical Programming (Oncology)

[Apply Now](#)

Company: SEC Life Sciences

Location: Belgium

Category: computer-and-mathematical

A leading firm in the oncology research sector is in search of a Manager, Statistical Programming. This pivotal role is centred around managing statistical vendor deliverables, boosting data quality for regulatory submissions, and pioneering oncology programming standards, contributing significantly to the progression of cancer treatment research.

This position can be fulfilled remotely from anywhere within the EU. Applicants must have the right to work in the EU in order to be considered.

Your Role:

Lead programmatic reviews of datasets and statistical outputs to ensure top-notch quality for pivotal studies and regulatory submissions.

Oversee project timelines and execution with statistical programming vendors to guarantee quality deliverables on schedule.

Drive the development of programming standards to enhance efficiency and quality in oncology research.

Offer essential programming support for regulatory submissions, including swift responses to regulatory agencies.

Craft and maintain programming macros for thorough internal data review and monitoring.

Experience and Qualifications:

Strong experience in the pharmaceutical or CRO industry, specifically in clinical trials programming.

Proven lead experience at the study-level, with a preference for candidates with prior exposure in Oncology Therapeutic Areas (TA).

Advanced proficiency in SAS, CDISC SDTM, and ADaM standards, with a robust understanding of statistical concepts.

Demonstrated ability to support global development projects through to regulatory submissions.

Exceptional project management, organisational, and problem-solving skills.

Flexibility to commit to US working hours, including availability for occasional meetings during US hours.

This role is suited for a dynamic professional eager to make an impact in the field of statistical programming and oncology. If you're ready to contribute to meaningful advancements in cancer treatment and meet the above criteria, we encourage you to apply now for immediate consideration. For those seeking similar opportunities in the sector, please reach out.
