MLOps Engineer

Apply Now

Company: Tobania

Location: Hasselt

Category: computer-and-mathematical

What can you expect?

Python Predictions is currently looking for an experienced MLOps engineer. In this role, you will need to be able to adapt quickly to new technologies, applications and environments. You will operate with our current clients on a medium to long-term basis.

As an MLOps Engineer, you will help our clients with automating and managing the machine learning lifecyle. More specifically, the responsibilities include:

Design and implement solutions to automate the experimentation and release cycle of machine learning, from traditional ML to LLMs

Identify, design, and implement process improvements in the machine learning lifecylce: automating manual processes, optimizing data delivery, re-design infrastructure for greater scalability, etc

Collaborate with Data Scientists, Machine Learning Engineers, Data Engineers, and other IT roles to integrate all parts of the solution.

Implement CI/CD pipelines, IaC, monitoring for models and infrastructure

Coach colleagues and clients in your area of expertise

Who are we looking for?

Master or PhD in Machine Learning, Artificial Intelligence, Computer Engineering, or related field.

At least 3 years of experience as an MLOps Engineer, Machine Learning Engineer or in a similar position.

Experience managing the machine learning lifecycle in production, and related MLOps frameworks .

Master CI/CD pipelines and Infrastructure as Code.

In depth knowledge of containers and container orchestration.

Solid understanding of Linux and in depth knowledge of at least one cloud provider.

Programming experience with Python.

Experience with monitoring and logging technologies

Good grasp of big data technologies such as Apache Spark, ElasticSearch, Kafka

Able to coach others and give technical advice and direction

Understanding of networking, firewalls, and IT infrastructure.

Able to work independently, prioritize multiple stakeholders and tasks, and manage work time effectively.

Proficient in English, knowledge of Dutch and/or French is a plus.

Bonus
Experience with Data Quality and Governance

Experience with Data Engineering

What do we have to offer?
Python Predictions is a Brussels-based service provider specialized in data projects with business impact

In January 2020, Python Predictions joined Tobania a leading Belgian business & technology consulting. And in turn, in March 2023, Tobania joined Sopra Steria a major Tech player in Europe recognized for its consulting, digital services and software development

Great variation in job content due to missions in different industries, different domains and

different environments

In-company training adapted to your personal needs

Continuous learning in monthly team meetings and personal development time

A great team of colleagues with shared values
