

## Mobile Communication Internship

[Apply Now](#)

Company: Toyota Motor Europe

Location: Zaventem

Category: computer-and-mathematical

### Your team and your responsibilities

#### Team/division description

Within Electronics Engineering division, Connected Technologies is responsible to develop future connected functions focusing on our customer comfort and safety. These systems use Mobile communications (4G / 5G and short range direct communication) to link our vehicles with our connected infrastructure and other vehicles.

#### Your project

To improve the current cellular network testing process to improve efficiency, coverage, and compatibility with future technologies.

Collaborate with development teams to understand product specifications, features and current processes.

Implement testing frameworks and tools for functional and system tests.

Design, develop, and execute automated tests for cellular network devices.

Analyse test results, identify issues, and provide detailed bug reports.

Maintain and enhance existing automated tests to improve efficiency and coverage.

Want to know more about how it is to work at Toyota? Check-out Or

#### Your Profile

You are fluent in English (TME business language)

You are enrolled into a master in Telecommunications engineering, Computer science, Electronics engineering, or Automotive engineering

You have (or you are willing to develop) a good understanding of application lifecycle management, validation process, and the telecommunications networks

You have already demonstrated programming skills in past projects (Python, C++, ...)

You have a strong interest in automotive and electronics systems
