

## MongoDB Administrator

[Apply Now](#)

Company: Euroclear

Location: Belgium

Category: computer-and-mathematical

Division: Group Technology Services (GTS)

### **Responsibilities:**

Installing, tuning, and upgrading the infrastructures

Proactively and regularly making recommendations for database improvements (policies, procedures & standards)

Monitoring system performance and identifying problems that arise

Responding in a timely manner to user-reported errors

Protecting the database against threats or unauthorized access by establishing and maintaining security and integrity controls

Ensuring that the database is adequately backed up and able to be recovered in the event of disaster

Reporting on metrics regarding usage and performance

Suggesting changes and improvements for database maintenance, performance, reliability, and protection

Regularly liaising with IT project teams including database programmers

Maintain detailed documentation of database design/architecture & configuration

This position includes participation in the watch duty role (24/7 on call for a total of about 7 to 10 days per month).

**Requirements:**

3+ years of experience in MongoDB database administration on premise and/or in Microsoft Azure (MongoDB Atlas)

Hands on experience in the Life Cycle Management of MongoDB (installation, migration, upgrade, patching)

Hands on experience with building and maintaining MongoDB replica sets and sharded cluster

Good understanding in Performance Tuning and Query Optimization, using native monitoring and troubleshooting tools

Experience on MongoDB scaling across data centres with MongoDB HA strategies, including replica sets and sharding

Experience with backups, restores and recovery models

Experience in automating database administration tasks

Hands on experience with hardening a database

Experience in Privileged Access Management - authentication mechanisms like LDAP, Kerberos, Active Directory and SAML

Experience in Python, shell scripting, Ansible playbooks and MongoDB tooling like Mongo Shell, Compass and OpsManager

Experience working with Linux servers, including proper disk configurations

Analytical mindset in troubleshooting and resolving database problems

Critical thinker and problem-solving skills

Good communication and documentation skills in English

Team player highly organized with a sense of ownership

Ability to work under pressure and to deadlines

Ability to learn quickly and adapt to handle complex situations

**Nice to have:**

Mongo Certified DBA

Experience with ServiceNow & Azure DevOps

Experience with Ansible playbooks

Experience with other database systems like **PostgreSQL** , MS SQL Server & Oracle will be considered as an asset
