

MSAT Scientist

[Apply Now](#)

Company: STAR GROUP

Location: Belgium

Category: computer-and-mathematical

Responsibilities

As a MSAT Scientist you develop, execute and/or transfer liquid-chromatography coupled to mass spectrometry (LC-MS) methods.

You act as an expert for LC-MS and analytical HPLC.

You integrate characterization LC-MS data with process/product knowledge.

You are responsible for the end-to-end method, starting with method development up to method validation and transfer into a quality control organization.

You are responsible for the identification of improvements for existing methods to introduce new technology, increase method robustness, and reduce release cycle time.

You do the investigational support for product and process, generation of scientific/technical study protocols and report.

You are responsible for the impact assessment upon signification deviations in the analytical methods, production process and providing technical/scientific expertise.

You support analytical activities for product characterization, transfer and process improvements for products in late development, next-generation, or commercial phase.

Requirements

You have a PhD or Master in Life Sciences or equivalent through relevant experience.

Prior hands-on experience with LC-MS is highly desired.

Experience with large molecule LC-MS data interpretation (at intact or peptide levels) is a plus.

You have a good fundamental understanding of chromatography methods and can rely on this knowledge to accelerate projects and support troubleshooting. Prior hands-on experience with liquid chromatography and troubleshooting is highly desired.

You have at least 3 years of relevant experience in method development, validation, and investigation testing/support in an analytical function. This experience can be acquired as company or academic experience.

You have a good understanding of GMP and the manufacturing and testing of biologics.

You have a quality-oriented mindset.

You are fluent in writing and speaking in English.

You are flexible and willing to adapt to changing priorities and willing to learn at a rapid pace.

You are willing to support small-scale studies, quality investigations and MSAT-driven projects both in the lab and as part of a cross-function team.

You have an excellent analytical problem-solving mindset, you are accurate and have an eye for details

You are familiar with various statistical and data trending techniques.

You are a strong communicator, who can connect, go into discussion, and find compromises with people in other departments or sites.

You feel comfortable presenting/speaking in public.

You like to work in a team and consider yourself a good team player.
