

## Network Engineer

[Apply Now](#)

Company: Euroclear

Location: Belgium

Category: computer-and-mathematical

### **Division: Group Technology Services (GTS)**

#### **Network Engineer**

Group Technology Services (GTS) plans, builds and runs the global infrastructure of Euroclear, and is additionally responsible for the IT service management to the operating entities of the various Group markets. Group Technology Services operates its IT systems and IT services in such a way that, at an appropriate and benchmarked cost level, it can deliver the agreed levels of service to support the requirements of the business processes, for both normal operations and during disaster recovery.

You will join the Network Engineering team that is responsible for the day-to-day operation, evolution, monitoring and automation of the Euroclear group network environment. In addition, the team is also involved in Business and infrastructure project support and delivery.

#### **Responsibilities:**

Setting up, configuring, and supporting network applicative Infrastructure (HLB, DNS, IP, Firewall rules,

Creating network design based on applicative requirements

Participating in cloud network review

Reviewing, implementing and enhancing our network environment

Assisting with maintenance of current documentation of related corporate network

implementation

Taking part in troubleshooting network systems

Providing network project support to other teams with the implementation of enterprise and operational service upgrades and new initiatives

Taking part in Infrastructure and Business projects by delivering the required infrastructure (and related documentation)

Performing vulnerability assessment, validation & upgrade on the Network Systems/Applications

Maintaining process like Configuration Management and Monitoring of the infrastructure

Optimizing our current network implementation and introducing automation services in our environment

**Requirements:**

Extensive experience in the field or in a related area

Experience in F5 Technologies

Experience in Infoblox product management

Experience in Network Security Management Systems as Palo Alto and Checkpoint firewall

Knowledge of the AlgoSec product

Experience in Azure Cloud Networking and Security

Good knowledge of routing and switching technology (BGP, ISIS, OSPF, VRF, MPLS, GRE, IPSEC, OTV)

Excellent understanding of TCP/IP protocols and related DNS (Infoblox), QoS

Fluency in English (French and/or Dutch would be a plus)

**Nice to have:**

Degree in Computer Science or Certifications in Network Technologies, Information Systems, or other related disciplines

**Soft skills:**

Able to work analytically in a problem-solving environment

Have excellent customer service skills

Able to learn new technologies and disciplines quickly

Able to function effectively in a fast-paced and team-oriented environment

Able to effectively communicate with other team members

**Additional Information:**

This position will involve regular trips to Paris or Brussels (at least once per quarter)
