Category: computer-and-mathematical

The Offer

Work within a company with a solid track record of success

Flexible working options

Join a well known brand within IT Services

The Job

Role Description:

Improving the content and quality of digital maps, which are used by millions of users globally.

Detail-oriented, likes doing research and has a good knowledge of national and local **geography**.

Work in your own time whenever work is available.

Completing research and evaluation tasks in a web-based environment, e.g., verifying and comparing data, determining the relevance and accuracy of information.

Provided with guidelines for each task, which need to be followed. The project offers a variety of tasks, and work is paid per task.

Working on this project will require you to go through a standard recruitment process (including passing an open book assessment). This is **along-term project** and your work will occasionally be subject to quality assurance checks.

The Profile

Requirements:

Must have native-level proficiency **English and Dutch** to be able to effectively liaise with stakeholders in the region.

Residing in **Belgium for the last 2 consecutive years**

Ability to follow **guidelines** and do **research** online using search engines, online maps and website information

You must have familiarity with current and historical business, media, sport, news, social media and cultural affairs in **Belgium**

Being open to work across a diverse set of Task Types (e.g. Maps, News, Audio tasks, Relevance)

The Employer

Our client partners with a diverse and vibrant community to help our customers enhance their AI and machine learning models. The work of our client contributes to improving technology and the digital experiences of many people around the world.
