Company: Veolia

Location: Saint-Gilles

Category: computer-and-mathematical

Company Description

Flexcity is one of the principal flexibility aggregators in France, Belgium, the Netherlands and Italy. And Flexcity has just touched down in Spain! Flexcity optimises the real-time energy consumption/production of an extensive portfolio of flexible distributed energy assets. By optimising its portfolio, Flexcity helps balance the electricity grid and generates new income streams for its partners. Flexcity's portfolio comprises various technologies, such as batteries, decentralised generation and large industrial processes. Flexcity also integrates renewable energy sources into its portfolio, opening up new revenue streams for emerging technologies. Flexcity is a frontrunner in energy innovation. It has its own platform, optimisers and hardware that allow it to fully automate the operation of its portfolio. Flexcity is continuously expanding the services it offers its clients. The services now include; ancillary services (FCR, aFRR, mFRR), energy markets, congestion management, load-shifting etc.. As a team member, you will contribute to a sustainable low-carbon energy sector by allowing decentralised assets to become real actors in the energy transition.

Job Description

All our positions include engineering/technical knowledge or being very keen to fast learn about it
