Company: Amaris Consulting

Location: Belgium

Category: life-physical-and-social-science

### Job description

We are seeking a highly skilled and motivated Organic Chemist to join our team. This role offers an exciting opportunity to contribute to the development of solvent recovery processes for Active Pharmaceutical Ingredient (API) production, ultimately enhancing our ability to deliver high-quality pharmaceutical products.

#### Position Summary:

As a Scientist in Organic Chemistry specializing in solvent recovery, you will be responsible for designing, optimizing, and implementing solvent recovery methods to ensure efficiency and compliance with regulatory standards. You will collaborate closely with cross-functional teams, conduct experiments, and employ analytical techniques to assess solvent recoverability and purity. If you are a passionate and experienced Organic Chemist with expertise in solvent recovery and process optimization, we invite you to apply and join our dynamic team.

#### Responsibilities:

Utilize process simulation software for designing and optimizing organic solvent recovery efficiency.

Conduct distillation experiments in the lab to assess solvent recoverability and identify areas for process improvement.

Evaluate and document the analytical purity results of recovered solvents to ensure

compliance with quality standards and regulatory requirements.

Perform quality and risk assessments related to the usage of recovered solvents in API production.

Coordinate the development of analytical methods for the analysis and characterization of recovered solvents.

Collaborate with cross-functional teams to optimize solvent recovery processes and implement best practices.

Stay updated with the latest advancements in solvent recovery techniques and apply them to optimize recovery efficiency.

### **Profile Requirements:**

Master's or Ph.D. degree in Organic Chemistry or a related field.

Strong expertise in organic chemistry, particularly in solvent recovery processes.

Proficiency in evaluating and documenting analytical purity results of solvents using GC-MS, LC-MS, and other techniques.

Experience in performing quality and risk assessments related to solvent usage in API production.

Knowledge of analytical method development and characterization techniques for solvents.

Hands-on experience with distillation experiments and solvent recovery equipment.

Experience in the pharmaceutical or chemical process industry.

### **What we offer:**

Join our dynamic team of talented people and discover a world full of growth and opportunity. Here's what we offer:

Rapid growth through a personalized career path and salary evaluation. 70% of our senior leaders started in entry-level roles.

A competitive salary and benefits package

Hone your skills through our catalogue of our Technology Academy, the Udemy platform, language lessons, webinars and workshops.

Take control of your training with an annual personal budget and company-paid certifications.

Enjoy flexible policies, remote work options, and great social benefits like transportation, help with relocation for internationals and collective health insurance.

Take advantage of our WeCare program, which provides support to employees in critical situations.

Unleash your full potential, both professionally and personally.

*Amaris Consulting prides itself on being an equal opportunity workplace. We are committed to promoting diversity within the workforce and creating an inclusive work environment. To that end, we welcome applications from all qualified candidates, regardless of gender, sexual orientation, race, ethnicity, beliefs, age, marital status, disability, or other characteristics.*
