

Pipeline Integrity Consultant

[Apply Now](#)

Company: Intero Integrity

Location: Belgium

Category: computer-and-mathematical

Who are we?

We are the contributors to a better environment. You can sense the winds of change in the oil, gas, and chemical industries as they move through the energy transition. As a key part of Intero, Intero – The Sniffers combines global field emission measurements and pipeline integrity surveys with expert knowledge and advice.

Our global client portfolio appreciates our know-how and our accredited processes.

Founded in Belgium in 1 and headquartered in Belgium, Intero – The Sniffers has successfully performed over 9. emission reduction projects in over countries.

In December 9, The Sniffers was acquired by Intero Integrity Services and was thus rebranded to Intero – The Sniffers. Intero Integrity Services is a worldwide business headquartered in The Netherlands with a track record in pipeline inspections and industrial services. Together, we have the ambition to expand and further build our environmental service range based on years of experience and position in the market.

To continue our growth journey, we are looking for M/F/X

Pipeline Integrity Consultant

What does your day look like?

Execution of pipeline integrity management studies including fit for service and fit for purpose assessments, risk assessment and life extension projects

Review of external/internal inspection data and make appropriate recommendations based on the findings

Propose solution for pipeline repair, corrosion monitoring, leak detection

Support pipeline corrosion assessment studies

Contribute to the digitalization of our environment : by giving inputs to the Software Team for the further development of our own powerful Software platform PRIMIS

Support Business Development and Key Account Management ; preparation of presentations, technical articles, and marketing material, providing input/lead tenders.

Who are we looking for?

We value motivation and experience in the domain of the vacancy : ideally you reached an engineering level in the field of Pipelines, GIS, Integrity, Risk, Chemical, Mechanical or equivalent.

You have a basic knowledge on pipeline design and construction, operations and safety.
