## Power BI Consultant

Microsoft, data & ai, some experience, consultant Belgium share on

When we say **data**, you say **analytics**! You're **passionate** about data and what it can mean to organizations. You're curious, **ambitious** and ready to become an even better data analyst than you already are.

If there's one tool that stands out to you, it's probably **Microsoft Power BI**. Either way, with your far-reaching knowledge about the **Microsoft technology stack and Azure** you'd feel right at home among like-minded **experts**.

You're eager to start **building** integrated data solutions, and can't wait to show companies the many **possibilities** that are hiding in their data. Guess what – that's exactly who we are looking for!

Got a deep passion for **data** and **Microsoft technologies** such as Power BI? Then let's talk.

**Apply for Power BI Consultant!**

**Thank you for your application.**

**We will get back in touch with you soon! Have a great day!**

read our stories

### **Who are we?**

We're the **Microsoft Analytics** team: we design and build **end-to-end data platforms** using Microsoft technologies. Together with our customers, we determine which concepts, projects and solutions best fit their organization. **Power BI** obviously is an important tool to us for reporting, but we work out complete data solutions, including a **data strategy**. From creating the most basic reports to building a data architecture from scratch – you name it, we've done it..

We're a dynamic and diverse team of **data lovers**, skilled in data cleaning, data warehousing, data analytics, and data visualization. **Our mission** is to help our customers to get to know their own company even better. As Microsoft experts, we are convinced that **Azure** technologies (Azure Synapse Analytics or Azure Data Factory, to name but a few) are crucial to that. Sure, we have a strong cloud focus, but our **SQL Server** expertise is also a strong asset.

Coding may not be the main part of our job, but as data lovers we know how important it is to be able to program. So yes, building data platforms requires both **tech skills** and a **business mindset**. That's what we **bring the best of both worlds**

Just so you know: delaware has its offices in **Antwerp, Ghent, Kortrijk, Lummen, Liège** and **Wavre**, but we also spend a lot of time **working on site** with our customers, wherever they are based.
