Company: Desmet Ballestra

Location: Belgium

Category: computer-and-mathematical

## Process engineer - Liquid

### Job summary

As part of the Process Engineering team you are responsible for the engineering process of refining, fat modification and oleochemical plants.

### Key accountabilities

Design and calculate the refining, fat modification and/or oleochemical process of sold projects based on contractual and customer specifications, and on Desmet standards and best practices.

Size and specify the required equipment.

Produce and compile related engineering documents (basic PFD, heat & mass balances, utilities & consumptions, P&ID's, operating manuals, description of automation, HAZOP studies, ...).

Perform plant start-up and commissioning activities and carry-out troubleshooting.

Gather and report site technical data and experience to improve our products and processes.

Improve existing processes and equipment.

Participate in and support R&D activities and projects: perform feasibility studies and contribute to the development of new designs.

Give internal support and assist customers regarding health & safety issues, environmental aspects, permits,...

### **Required profile**

#### **Required Education / Experience**

Master in Engineering (Chemical, Mechanical or Bio engineering).

#### **Knowledge, Skills & Abilities**

Special interest for processes and Unit Operations.

Pro-active and self-driven attitude, able to prioritize & meet deadlines.

Accurate and work organized.

Team player, sharing essential information.

Sufficiently analytical for trouble solving

Willingness to travel for short periods, representing our company.

English is required, French or Dutch preferred (strong asset), and any other language is an asset.

### **Our offer**

You will join a global market leader in an international environment with highly talented colleagues. We'll offer you a fulltime position with an attractive compensation package with good benefits and the opportunity to grow and develop in your skills, competencies, and career.
