Company: ArcelorMittal

Location: Belgium

Category: other-general

Mission

████████ean CDO Digital team has as mission to steer the digital strategy across all locations with high focus to support following business axes across our industrial processes : H&S - Productivity - Quality - Maintenance - Logistics - Reporting - Supply chain and the Flat Europe Decarbonization Green Steel Strategy

What you will do : Project & role description

████████████████████████████ou take the lead on the further roll-out of our Projects & Asset Lifecycle Information Management (ALIM) central platform. ArcelorMittal Flat Europe has chosen to deploy the cloud based, data-centric Asset Lifecycle Information Management (ALIM) solution SDx of Hexagon, aiming to create a reliable digital twin that intelligently allows to feed data needed for operations & maintenance from the project's deliverables. This platform is currently used as the document management system for our project engineering teams working on Green Primary sustainability program. It allows them the tooling to easily exchange, review and store of all kinds of project documents and (3D) drawings between our local and central engineering teams and OEM/EPCM partners. In the next stage we have to extend the use of this platform to maintenance and operations teams.

The platform was recently put in operations; further enhancements are getting build by the project team (ArcelorMittal + Hexagon), IT service management processes (change & release mgmt etc) are applied to ensure the operational governance and stability of this platform.

As a IT Product Owner we do expect that you further roll-out and enhance the product

together with the various stakeholders. This means you bridge the gap between the product strategy and its development to drive our business forward.

- You broaden the scope of use to other projects and extend functional product coverage from project to operations scope. You guide these cluster and user communities with their project setup and product onboarding.

- You build a product vision & strategy, and translates this into a roadmap for execution.

- You collaborate with users to understand and anticipate their needs and translate them into product requirements. Mastering the product, its functional capabilities and AM product configuration not have any secrets to you.

- You manage the demand as a product backlog together with the key users.

- You follow-up the implementation and guarantee that changes meet business requirements, and do not induce any regression impact after deployment.
  - Easy configurations done by AM, more advanced configurations (and developments) together with Hexagon.

  - Being hands-on you're not afraid to perform some business & system administrative activities yourself.

- You manage the relations and collaboration with the various customer stakeholders and the product supplier.

- You steer the key user community, and guide the users to get the max out of the platform.

- You govern the product quality & robustness in service delivery & daily operations.

Next to the further settlement of the product to support in project mode, the further preparation of the product to support in maintenance & operations is a key objective. At First you will co-run together with existing project lead to get acquainted with the functionalities and use of the platform in the context of the DECARB program and other scopes. You will come in touch with various stakeholders part of the central and local teams involved in the program. Additionally you further optimize the product support & stability

together with the Plant of the Future IT lead.

Additionally

> You follow market evolutions on engineering document management & asset lifecycle information management and evaluate, with both central and local business experts, how these can be applied into our steelmaking industry.

> You will be actively involved in our Plant of the Future (PotF) team in designing and implementing the digital foundations of tomorrow – scoped to the project & ALIM domain and beyond. By turning ideas into implemented pilot cases you demonstrate the technical feasibility and business value.

> You follow & support in a broader context the digital initiatives and pilots ongoing in the different Flat Europe plants, you reach out to these stakeholders and do build a network.

Your profile:

> You have a Technical oriented Master's Degree in Digital, Computer Science, Automation Technology, or a related field or showing high experience on technical orientation. Real job experience within that field is a plus.

> Having practical and/or organizational experience with EPC tools for document & collaboration management is major plus. Being acquainted with PowerBI report development is welcome.

> You are an entrepreneur with a passion for digital technology and industry. So a big interest in how new digital technologies and trends evolve and are applicable is essential, such as Industry 4.0 , IIoT, big data analytics, cloud computing, edge computing, smart automation, and artificial intelligence.

> You stimulate safety awareness within and across our organisation

> You are very result driven and have dedicated energy and determination to move projects forward

> You have good communication skills with the ability to interact effectively with

stakeholders such as the different plants of the Flat Europe scope, the local digital officers, the Chief Digital Office team, suppliers, …

Proactive and results-oriented mindset with a passion for innovation and continuous improvement.

You have analytical and problem-solving abilities, with a strong attention to detail – your will to go into depth of the product and to be open to be hands-on is key to mastery.

Creativity, out-of-the-box thinking, endurance, team spirit and focus are key elements of your personality

Mobility is required for travels related to project based supporting the different locations within Flat Europe

English is mandatory. Mastery of additional European languages is a plus.

If you find your skillset and experience in line with our requirements, we encourage you to join our CDO team at Flat Europe and contribute to continuous improvement of our digital strategy and its quality of the delivered systems.

Self-motivated, proactive, and able to work independently as well as part of a team.

Loves information sharing & bringing other people on another level by guiding/coaching

Being proactive, innovative, curious, and bold and willing to understand, challenge and support our business

Looking for opportunities to develop and grow.

Change leader with natural intelligence to interact with different teams across Flat Europe

Can work autonomously

What can we offer you ?

ArcelorMittal is all about equal opportunities and values diversity. We only select candidates on the basis of their competences. Your age, gender, ethnic origin,

orientation, religion, disability, nationality, etc. do not affect your chance to help build sustainable circular steel solutions for the future.

You can count on an attractive salary package. In addition to a very competitive basic salary supplemented by a number of premiums, we offer meal vouchers, interesting group and hospitalisation insurance and other extra-legal benefits. Moreover, you can opt for a company car or bike and you get 40 days of leave per year!
