

Project Assistant

[Apply Now](#)

Company: SABCA

Location: Lummen

Category: architecture-and-engineering

At our Lummen site, SABCA Limburg, we are specialized in the manufacturing of high-tech composite assemblies for aircraft. On the one hand, we produce integrated skins for flaps and stabilizers using two automatic tape-layers and very large autoclaves and of course, our colleagues' extended know-how. In cooperation with the Engineering office in Brussels, SABCA Limburg is also responsible for the flap track fairings of several aircraft.

On the other hand, the Space industry is also present in this plant with the final system integration of Ariane and Vega assemblies.

Tasks:

Responsible to set-up (and maintain) a combined project plan for all F35 contracts in MS project, based on the input from the different project managers and the F35 program manager

Create transparency in the customers milestones;

Create transparency in the critical path;

Create transparency in the resource workload;

Create transparency in the budget spend;

Reports to the F35 program manager;

Profile

Part time assignment: 2 days a week

Experienced project manager (assistant);

Expert in MS project:

Experienced in Aviation and Aerospace or Automotive is a plus;

Experienced in composites is a plus;

Strong communication capabilities;

Fluent in English is a must, knowledge of Dutch is a plus;

So, What's in it for you?

Experience! Gain new experience to thanks to the full range of services we offer to the civil, space and military aviation markets as well as to the commercial

Unmanned Autonomous Systems (drones). Our activities include designing, manufacturing, maintaining, and upgrading large and complex elements for aircraft and space launchers for customers and partners belonging to the elite of the aerospace industry.

Excitement! Work in an exciting environment where long-standing expertise and research and technological development feed off each other.

Sabca collaborators have their passion and their know-how as common denominator.

Teamwork, reliability and innovation are part of the culture we value and that lead us to success.

Challenges! Help Europe access to space by designing and manufacturing rocket structures.

Be part of the pioneers in developing advanced air mobility solutions inside our division dedicated to drones. Use your knowledge to take people around the world on board low-carbon aircraft.

Contribute to the environmental and technological challenges of the century. Play your own role in the fast-moving world of aerospace.

Be ready for take-off!
