Company: Fluor Corporation

Location: Belgium

Category: computer-and-mathematical

Job Description

Fluor is one of the largest global engineering, procurement, fabrication, construction and maintenance company with projects and offices on six continents.

Fluor Engineering NV, located in Antwerp, is focused on developing long-term relationships with customers in revamping, debottlenecking and expanding the production capacity of their existing facilities in all sectors of the Process Industry in Belgium: Chemical, Petrochemical, Power, Life Sciences, Food, Pharmaceutical, Recycling,.. The Antwerp office provide the full project execution services: from conceptual engineering, basic engineering, and detailed engineering through commissioning and construction support.

The Project Controls Team consists of Planning and Cost Engineering professionals.

As a Project Controls Specialist, you will perform activities for the overall Project Controls effort for a project.

Your main responsibilities will be:

- . Develop, implement, and direct the total Project Controls program
- . Implement the Work Breakdown and Project Coding Structures
- . Analyze variances in cost or schedule performance against the plan
- . Communicate the reasons for the issuance of variance

- . Propose mitigation plans to Project Management
- . Contribute to the proposal efforts for cost or scheduling activities
- . Review project profit recognition
- . Provide evaluation of opportunities with management
- . Manage project schedule including critical path activities
- . Review schedule float for schedule slippages
- . Other duties as assigned

This position performs Project Control functions related to cost and/or schedule and assists in the preparation of Project Controls activities for a project or assignment.

- . Prepare the Work Breakdown and Project Coding Structures for control and integrity of work to be performed as defined by the contract
- . Accumulate and compile accurate cost management data to prepare the project budget and update the progress of the project
- . Develop cost control/scheduling procedures, execution plan, and business plan for a project
- . Participate in weekly project cost reviews/schedule meetings
- . Develop and implement a basic change management system for engineering and construction
- . Develop and maintain Management, Project and Control level schedules
- . Other duties as assigned

Basic Job Requirements

- . Bachelor or Master degree
- . 4-6 years of relevant work experience as a Project Controls Specialist
- . Excellent communication skills in Dutch and English both written and verbal
- . Experience with Scrum, Lean, Agile Methodologies or willingness to learn in practice
- . Ability to attend to detail and work in a time-conscious and time-effective manner
- . Flexibility to travel internationally for project assignments and in support of business related matter

To be Considered Candidates:

Must be authorized to work in the country where the position is located.
