Company: Desmet Ballestra

Location: Belgium

Category: computer-and-mathematical

Project Manager

Desmet is the world leader in developing, engineering and supplying technologies, processing plants and proprietary equipment for the food, feed and chemical industries.

The Oils, Fats & Oleochemicals division delivers tailor-made engineering and procurement services in preparation, extraction, processing, refining and fat modification for oilseed and edible oil processing plants. We master the processing of 40 raw materials, of which soybeans, palm oil, sunflower seed, rapeseed, groundnuts and cottonseed are probably the most popular.

Job summary

Based in our headquarters in Zaventem, you will oversee the overall execution of our industrial projects in Europe, Middle East, and Africa. Our projects, varying in size between k to 40 million €, involve engineering, manufacturing, supply, up to the supervision of the installation and commissioning of the plant, and in some cases including turnkey site works.

Key accountabilities

Act as central contact point between the client and all the internal departments as well as external vendors and subcontractors.

Coordinate and lead all people involved to reach the common goal of a successful, profitable project for all parties within the agreed deadline and to our quality standards.

Manage multiple projects in various regions of EMEA.

Travel (up to max. 20%) to clients, suppliers and group companies and take part in pre-sales negotiation meetings with client.

Organize & lead all project interface meetings from project signature until successful start-up.

Gather technical specifications from engineering departments, approving the specifications and drawings.

Send price inquiries to suppliers, filtering technically & commercially the quotations before finalizing purchase orders - in coordination with our purchasing department.

Prepare and update project planning and project progress reports.

Take control of project budget as sold and monitor the latest forecast revisions (material, hours & expenses)

Handle any commercial, legal, logistics issues with the client and guardian of our contractual obligations.

Required profile

Master's degree in Engineering (Civil, Bio, Mechanical or Industrial)

Fluent knowledge of English, French and/or Dutch (any other language is an asset)

Excellent communication skills in an international, multi-cultural and multi-discipline environment is a must, combined with real interest and understanding of industrial technologies

Excellent interpersonal skills - strong team management capabilities

Self-driven and hands-on mentality

Team player

Technical and administrative accuracy

Good organisational skills and pro-active approach

IT literate (MS Office, Outlook, ERP, CAD viewing, MS Projects, other planning tools)

Our offer

You will join a global market leader in an international environment with highly talented colleagues. We'll offer you a comfortable compensation package with good benefits and the opportunity to grow and develop in your skills, competencies and career.
