

## PROJECT MANAGER WATER ELECTROLYSIS GROUP (FOR AGC CHEMICALS)

[Apply Now](#)

Company: AGC Glass Europe

Location: Belgium

Category: other-general

**What if your  
next job was about...**

**Your mission :**

Join AGC's Chemical branch, one of the world's leading producers of fluorochemicals and fluorochemical materials. You will be based in their new laboratories at the Technovation Centre in Gosselies (Belgium).

Their objective is to support the European Green Deal by expanding hydrogen related developments and to become number one in Europe thanks to the Proton Exchange Membrane (PEM). AGC Chemicals is one of only four manufacturers of this membrane in the world. AGC Chemicals is also active in the field of coatings and cosmetics.

You will be part of the Chemical group focusing on Water Electrolysis (WE) and will report directly to the WE Group manager.

**As part of your mission, you will:**

Comprehensively manage test data obtained from the Lab electrolytic cell, report and discuss it with internal members and external parties (customers, academic societies, debriefings at industry associations, etc.).

Propose and implement development actions.

Discuss the priority of evaluation tests with stakeholders

Conduct on site management of the water electrolysis lab: safety management, operational management (prioritization of operations, giving work instructions to operators during the

tests), maintenance of equipment.

Provide customer support (explaining and discussing technical data) to the membrane buyers

Visit customers and make technical presentations to promote membranes, as required

Be the spokesperson with the Japanese R&D center on all WE issues

### **Are you the perfect match ?**

#### **Your talents :**

Chemical engineer or PHD chemistry

Knowledge about electrochemistry, chemical engineering, and thermodynamics.

Experience in R D of (water, salt or other) electrolysis or fuel cell-related technologies is desirable.

Ability to communicate in English (speaking, reading, and writing).

Good communicator: with team members, internal/external stakeholders

### **What do we offer**

#### **Why you should apply ?**

A complete package including a competitive salary, 40 days holiday, luncheon vouchers...

A homeworking policy (2 days a week).

A complete training catalogue in the field of glass and chemical applications, personal and technical development as well as support during the first months of onboarding.

A stimulating work environment with innovative technologies, and a friendly, open-minded and talented team that respects autonomy while always listening to your ideas.

The opportunity to get involved in sustainable development: AGC is committed to the environment and social transition through its staff's involvement in a number of initiatives.

### **Curious to know more**

#### **about your future site ?**

You will be based at AGC's Technovation centre in Gosselies where research and

development, engineering and intellectual property activities are centralised under one roof with about 300 staff members. With different nationalities, the atmosphere reflects our values of inclusion and diversity: we value the uniqueness of individuals and the different perspectives and talents they bring to AGC. Our teams have a great exposure to different aspects of glass business and new technologies. They are driven by collaboration, motivation, curiosity and respect for autonomy. This makes daily work enjoyable and life easier.
